2013 - 2014

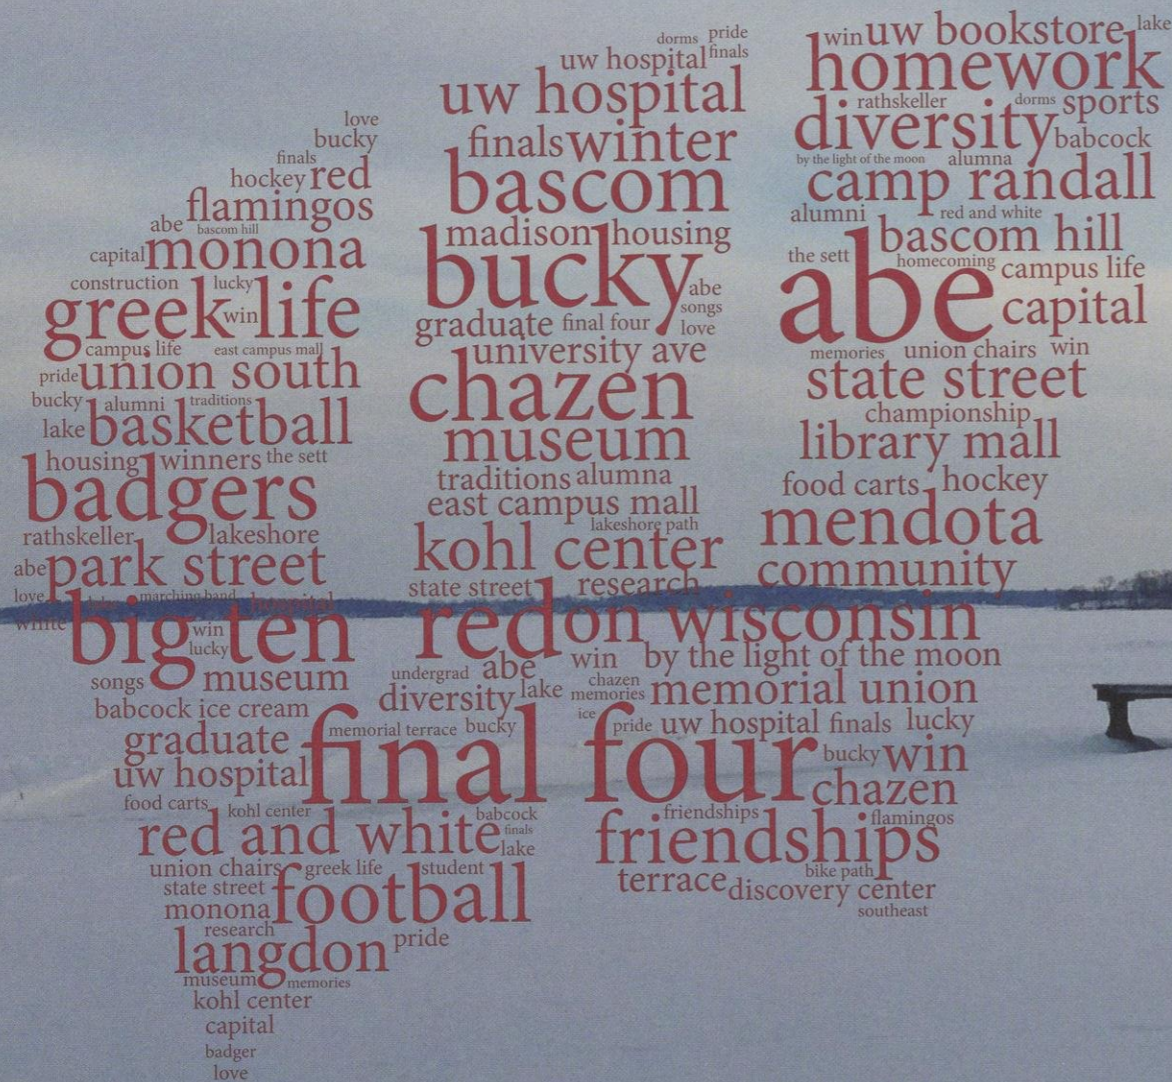

Photo by Claire Larkins

For 2013-2014, we wanted to try something different. We wanted to provide UW's students, staff, alumni, and all who could ever want a Badger Yearbook with something that has never been done before. After months of deliberation, we came to a startling conclusion—the Wisconsin Badger Yearbook has never been produced in full color. With this goal in mind, we set about collecting beautiful photography and creating a theme that would showcase those photos to their best abilities. Ultimately, we arrived at the product you have in front of you—a book focused on simple elegance, timelessness, and a classic aesthetic that will hold fast for decades. Our classic red accents throughout the pages and consistent theme allow the content of the book to stand out and make its presence known on every page. Make sure to find historical facts at the bottom of the pages and learn more about our school's history—you may learn something you never knew! As you look through the section division pages, you will see notable alumni featured on each section.* These men and women are those who we felt contributed to our world in local, national, and international ways—some are related to the section they head, and some are not. You might find that you recognize a few of the names!

We, the 2013-2014 Badger Yearbook Staff, are proud to give you this year's Wisconsin Badger Yearbook!

**All notable alumni in section pages are listed directly from the University of Wisconsin-Madison notable alumni web page. (<http://www.uwalumni.com/about/notable-alumni/>)*

Letter From the Editor

Dear UW-Madison Students, Staff, Alumni, and the Readers of this Yearbook,

I often find myself in this moment and others reflecting on this past year in its entirety, and I feel an overwhelming sense of happiness, pride, and accomplishment. This book represents those feelings for me—it encompasses all of the late nights, staff meetings, hours spent at the computer, organizing events, and the sheer volume of work that went into making this Yearbook possible.

Four years ago, I was a freshman cajoled into signing up for the yearbook by the Publisher at the time—he recognized me from home and convinced me to join the staff. Within a few weeks, I fell in love with this book and the people who make it possible. Now, as a recent graduate of the UW and looking back on my college career, I realize how instrumental and crucial the Yearbook was in giving me connections to new friends, other student organizations, opportunities on campus, and a real reason to talk to as many people as I could in the pursuit of photos and stories for the book.

This Yearbook is a tangible, touchable, hardcover-and-in-full-color memory device. There is something about a physical book—not an eReader, not a phone, not a computer—that creates a feeling of permanence. It affords us something that can't crash, delete our precious photos, or shatter. The smell of freshly printed pages, the sound of cracking open a book for the first time, and the feeling of flipping through photos of fond memories is incomparable.

Among these memories are my own personal ones—my family has a long history of UW Alumni, stretching back four generations. For as long as I can remember, I've cheered for the Badgers, worn red and white on Saturdays during football season, and visited campus knowing I'd be a student here one day. This university has always held a magical draw for me, but up until today, it was always prospective—"one day, when I'm a UW grad..." was a common thought. Now, I am a UW grad, and as such, I join in a long history of red-and-white-wearers, "If You Want to be a Badger" Singers, and Jump Around-ers. I join a community of researchers, free thinkers, award-winning journalists, people focused on a better tomorrow. We alumni (and how much joy it gives me to say that) are the foundation for building futures. We construct ideas that lead our micro- and macrosystems into success. I feel that this book, with all of its full-color glory, is a representation of the minds that come together with positivity and creative energy for the betterment of our world.

In true Badger fashion, I owe the success of this book to many people. To the whole Yearbook staff, thank you! You were all a pleasure to work with and I am honored to say that you helped create the first FULL COLOR Badger Yearbook. To Cassie Sterwald and Lexi Schroeder—you two are amazing. You were always there to pick up any task I could throw at you and you did it with smiles on your faces. I know that you will totally rock out the 2014-15 book and that you'll learn from our experiences together and you'll forge a new path where it's needed. To Pa Shoua Thao—I could not complete this book without you. We would not HAVE a book without you. Your creativity and talent have led us to this fabulous product that is a beautiful and inspiring representation of our last year as undergrads. I am so deeply grateful to you. To Katie Piekarski—your business smarts and new ideas for how to spread the message about the Yearbook were always fantastic and awesome. All of those late nights in the office really came to fruition in this book and the number of people we reached! Aaron Redlich, Emily Kuckes, Christian Blatner, and Katie Sonnentag—thank you all for the dedicated hours you put into making this book a reality. Without your photography, marketing skills, and new ways of approaching old problems, we wouldn't be nearly so successful!

I am honored to be a Badger. I am honored to be part of my family of Badgers in all senses of the word, "family." Because we are a family—whether we are born to alumni, make friends with students on campus, meet fellow Badgers all the way across the world, or find some random connection at a cafe in Small Town, USA, we have a connection to one another.

Please, let this book be your glimpse into the connections we made in 2013-2014. It will always be that way for me.

With gratitude,
Eliana Berkoff

Student Life

Photo by Claire Larkins

Student Life is nebulous, all-encompassing, and covers just about everything we as students experienced during our time at UW-Madison. It is sitting in Union South while trying to study, walking down State Street after a winning football game, a trip to the Farmer's Market with visiting family, and so much more. While one section of one book obviously cannot cover all that makes up every student's experience, this year's Student Life section features a melding of academics, student organizations, and happenings around campus that we felt showcased many parts what it means to be one of nearly 40,000 students at the UW.

Assassination 50 Years Ago

John F. Kennedy was assassinated 50 years ago this fall. In 1963, the University gathered together to mourn on Bascom Hill.

Written by Cassie Sterwald

November 22, 1963 is a day that will never be forgotten. Fifty years ago, Lee Harvey Oswald assassinated the 35th president of the United States, John F. Kennedy, in Dallas, Texas. This moment will forever live in the minds of those who experienced it as a time where they can recall exactly where they were and how they found out.

The assassination left people stunned and shocked worldwide. There was confusion directly following the shooting as everyone began to understand and learn about what had occurred. It was chaotic, as not everyone knew what was going on. All around the country people gathered together to watch coverage on television sets and pray. Cars and traffic came to a stop as the news spread on radio stations. Schools dismissed the students early and canceled classes completely for a few days following the assassination. Airports shut down. Churches became overflowed as people went to pray and pay their last respects to the President.

Here on campus in 1963, the university community gathered for a memorial service after JFK's assassination. At the

time, the university president was Fred Harvey Harrington. News, even news as big as this, did not travel as fast in 1963 as it does today. Some students had heard about the assassination and asked professors to keep the radio on during class, but most professors ended up dismissing their students. Other professors failed to show up for their class after hearing the news. Students taking exams were dismissed when other university officials came bearing word. Students began to form on Bascom Hill as they left class. On the day of his funeral, nearly 10,000 students crowded around Lincoln's statue on Bascom Hill for a memorial service. The University marching band played "The Star Spangled Banner." While no events were going on, people still crowded in the Rathskeller, but were quietly watching the TV. Capitol Square played patriotic songs around the time of the funeral.

The Wisconsin governor closed all public and private schools the day of Kennedy's funeral and activities were canceled. Nearly all stores and places of work were closed as well.

No one wanted to believe the President was assassinated. The day before, some

Kennedy family members were in Madison for a dedication ceremony, so people thought something must have happened to a different Kennedy, not accepting it could be John F. Kennedy.

All flags were immediately lowered to half mast once everyone learned Kennedy had died. Many football games for the following weekend were canceled, and those still played were done so with a lot of grief and mourning. Republican newspapers and magazines that had already planned articles quickly pulled any critical pieces about JFK.

In Madison and around the nation, people huddled around TV sets watching the news with Walter Cronkite, who was also barely holding in his tears. It was eerily quiet. Everyone was surrounded around the TV but no one was really talking to each other, they were just watching and listening. Everyone felt more intimate, close and united in a situation like this, as everyone shared the same grief. People from different races and political opinions stood side by side. Our country stood united, remembering and mourning the loss of our President. The atmosphere on campus was very similar to the atmosphere in the rest of the country.

Creative Writing Department Turns 35

Written by Cassie Sterwald

In fall 2013, the University of Wisconsin-Madison's creative writing department celebrated its 35th year. The creative writing department was officially established in 1978 by professor and poet Ron Wallace. However, the programs have been around for as long as the English major itself. Many famous poets and authors, such as Joyce Carol Oates, have come out of UW-Madison's creative writing department. Additionally, almost every post-graduate fellow wrote and published award-winning books.

Madison's creative writing department allowed for undergraduate and graduate students to read, write and study subjects like poetry, creative nonfiction, fiction

and playwriting. Undergraduates had numerous opportunities to become published writers through several different literary magazines and publications on campus. These undergraduates that chose to move on to graduate programs were consistently accepted into some of the most competitive and impressive graduate programs in the United States. Madison offered many reading and writing events, with off-campus bookstores hosting open mic or poetry readings, as well as the department bringing in authors and poets to hold talks and Q-and-As. Students majored in English with an emphasis in creative writing, allowing them to study

English literature in tandem with their writing track. Many of the classes creative writing students took were considered writing workshops. These workshop style classes allowed for theory and technique, reading and writing exercises, as well as a majority of time spent looking at student work.

The program was one of the most highly regarded creative writing departments in the country. The MFA program was actually ranked in the top three programs in the nation. The University of Wisconsin-Madison's creative writing program was very good, gave students many opportunities to write and be published, and last fall celebrated 35 years of excellent creative writing in the city of Madison with a party containing readings and panels at the Overture Center.

Paradise

The cool water on my bare skin
Takes the heat away from the sun
Shining down on me.
There's no place I'd rather be.
Than here, in this water, in this sand,
In this paradise
I escape from everything. I just focus on the moment,
Living in the present.
It's easy with no distractions.
No one calling my name or a list of stuff to do.
Here I'm alone, by myself.
Nothing to do but enjoy it.
Time passes more slowly.
I feel, see, stress leaving and relaxation engulfing—
Oh, I never want to leave.

Poem by Cassie Sterwald

In the fall semester, Cassie Sterwald took the introduction to creative writing to go towards her English major.

Students majoring in English have the choice to take the creative writing track. While there isn't a separate creative writing major, students can major in English with an emphasis in creative writing. All students have the ability to take an introduction to creative writing class, as well as English majors can take more creative writing classes that count towards the English elective credits towards the degree.

Science Hall Turns 125

Written by Cassie Sterwald

In fall 2013, Science Hall turned 125 years old. After the first Science Hall was destroyed in a fire, the current building was rebuilt in 1884 and completed in 1887. Over the past 125 years, it did not change much. The dark red brick walls and impressive architecture that made Science Hall so distinct and grand have been the same since the early days. When you walked around inside, you could see features that remained the way they were when built, like the 16 visible chimneys inside that were once used as the heating

system. Luckily, some minor changes, like the heating system, were made in order to modernize the structure. The building started out as the locus for all sciences, giving it the name Science Hall. It even housed some of the University Presidents. As of 2013-14, Science Hall was the home of the geography department, environmental studies institute, two libraries, a laboratory and the State Cartographer's office.

Science Hall was the oldest building that still standing and used a significant amount of structural steel. For this reason, as well as the impressive architecture, Science

Hall was so unique. In 1993, it was named a national historic landmark, making it a truly special building here on campus.

Over a century's worth of students have learned and studied in this building. As a student having class in Science Hall, I was truly amazed by this beautiful building. The exterior and interior were both so distinct and rich in architecture. I never knew before this fall that it was so old and nearly exactly the same as when it was built. If you've never been inside, you should definitely take a trip there. It's a Madison, national, historic and beautiful landmark.

An older photo of Science Hall on campus, which was constructed in 1887. *Photo courtesy of UW-Madison and the Department of Geography website.*

Art Spin

Changing Hands: Art Without Reservation 3 was held on February 22nd, 2014 at the Chazen Art Museum on campus. It featured contemporary Native North American Art from the Northeast and Southeast, along with a live Pow Wow dance and audience participation. The event was completely free

and had quite the array of ages! Children and adults together enjoyed the event's offerings, among which were dancing and history lessons about the significance of modern Pow Wow dancing. To the delight of the audience, a Native craftsman also constructed a traditional drum at the event.

Look closely and you can see the intricacy of the beadwork. *Photo by Morgan Schoo*

Art Spin invited people of all ages to enjoy themselves at the event by promoting learning art together. *Photo by Morgan Schoo*

Hosted by the Association of Women in Agriculture, people were able to experience a meal and investigate the farm.

Breakfast on the Farm

For the 19th Annual Breakfast on the Farm, the Association of Women in Agriculture (AWA) held a hearty, farm-style breakfast on the UW-Madison campus. While serving over 1,200 people that morning, the AWA educated families and children about their knowledge of agriculture, farm animals, and other aspects of living on a farm.

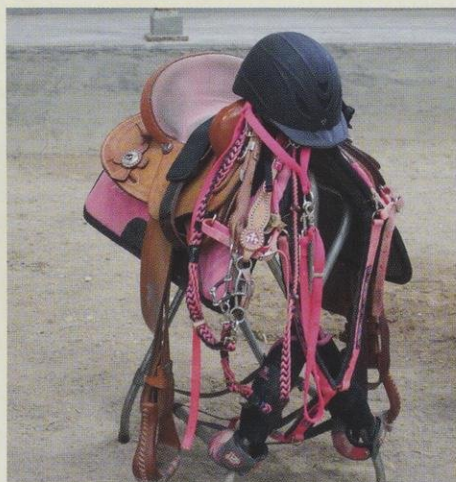

Part of the event included a food donation to Second Harvest Foodbank of Southern Wisconsin—they donated 336 pounds of food! The event also included a petting zoo, education corral and live entertainment, and ice cream with all the fixings! “Attendees [came] for food but [left] with a greater connection to Wisconsin’s most valued resource: Agriculture.”¹

Coaches vs. Cancer

Make Bo Pay

Photos and Article by Lexi Schroeder

Swish! The Kohl Center erupted in cheers of pride as yet another half-court shot is sunk and money pours from Coach Bo Ryan's pockets. But for a man losing money with every shot and every student that entered the Kohl Center, Ryan was all smiles as he congratulated and spoke to the students turned basketball stars, if only just for a night. Ryan and his wife donated \$1 for every UW-Madison student who attended the event, \$10 for every free throw made and \$1,000 for every half-court shot made. In total, 2,090 UW-Madison students packed the Kohl Center and 59 made half-court shots. Jacob Crocco, a team manager, commented, "Bo and the team love the event - it's a great way to donate, get the

students excited about basketball, and interact with the fans." Students received free food, connected with the superstars of the men's basketball team, and even attempted free-throws and/or half-court shots to "Make Bo Pay" to the organization Coaches vs. Cancer. The softball and football teams also paid tribute to the cause. Ashley Van Zeeland, a softball player sank the iconic half-court shot that sent the donation over the \$41,259 from the year before. Her response to the event was, "It's a part of the Wisconsin tradition, we support each other - especially for such a great cause." Students displayed their Wisconsin attitude that night, raising \$66,130 in the fight against Cancer. When asked about the event, Bo exclaimed, "We're going to continue until we find the cure right here in Madison!" Ben Brust, a guard for the team, added, "I'm fine with being here all night - the event speaks for itself."

CollegeFashionista

UW-Madison Fashionistas keep campus up-to-date on the latest fashion trends

Written by Cassie Sterwald

CollegeFashionista, a fashion blog dedicated to showcasing fashion trends on college campuses, was at campuses all over the country, including Madison. Students interested in fashion applied to be a Style Guru for their college. Style Gurus wrote weekly articles for specific categories on CollegeFashionista's site, such as "Style Advice of the Week," "Fashionista/o Spotlight," and "What to Wear." These Gurus sought out individuals on campus with great style to photograph, talk to and showcase in their weekly articles. The articles were live on CollegeFashionista's website for everyone to see, allowing people to understand what trends were popular on their campus and explore fashion on campuses around the country. It also gave the Style Gurus great experiences in fashion writing.

One Style Guru from each campus was selected to be Head Style Guru. The spring 2014 Head Style Guru, sophomore

Courtney Pelot, was in charge of planning meetings with the other Style Gurus, staying in contact with the directors of CollegeFashionista, and having Style Gurus participate in different fashion events in Madison.

Besides writing weekly articles, Style Gurus also took part in online fashion talks every month with insiders from the fashion industry. These talks happened on Twitter and allowed the Style Gurus from all campuses to connect with each other and learn about the field of fashion from people actually working in it.

CollegeFashionista incorporated social media as much as possible in everything they did. In March, CollegeFashionista created a March Madness social media challenge, where they selected Style Gurus from campuses all over the country and had them take a street style photo of themselves. All the photos were posted on Facebook and had to get the most "likes" in order to move on to the next round. Two of

Madison's very own style gurus were asked to be in this challenge, Courtney Pelot and Claire Larkins. Pelot advanced to the second round while Larkins advanced to the semifinals.

During spring, the social media director for CollegeFashionista, Sammy Luterbach, a Wisconsin Alumni, came back to Madison to host a panel about CollegeFashionista. She shared her experiences as the social media director and working for CollegeFashionista. She also gave advice to students about which classes people interested in getting into fashion should take, career and resume advice, as well as answering questions from students.

Towards the end of the school year, UW-Madison's Style Gurus were selected as the Campus of the Month and had their photo taken as well as a feature article written about them. These Style Gurus are always on the search for fashion forward individuals and it was awesome to have them on this campus.

Head style guru holds meetings with the other style gurus to help each other out and to plan different events on campus.

Dance Movement Therapy Certificate & work in local schools

Written by Cassie Sterwald

Not everyone responds to experiences in life the same way, so the same kind of therapy or counseling may not work well for different people, and that is where dance movement therapy may come in. The Madison area was full of dance movement therapy because UW-Madison offered a dance movement therapy certificate and the Hancock Center, a center solely for dance movement therapy, was located in downtown Madison.

Dance movement therapy is a form of psychotherapy that incorporates dance and movement to help a person become a healthier individual.

UW-Madison students could complete the dance movement therapy certificate to learn the basics of dance movement therapy, and could go to graduate programs to become licensed dance movement therapists. Students tested skills learned in class by working in Madison elementary schools with children in need of some form of therapy. Many certificate students became involved with the Hancock Center by volunteering to work with other programs, as well as in the in-school program.

The Hancock Center for dance movement therapy was started in Madison in 1983. Rena Kornblum was the executive director in 2013-14 of the Hancock Center and taught the dance movement therapy courses at UW-Madison. Another dance teacher at UW-Madison, Mariah LeFeber, was also a dance movement therapist and worked at the Hancock Center.

Kornblum began working in local schools when they expressed a need for help in 1992. Since 1992, the Hancock Center has grown from working in one school to eight or nine schools. The Hancock Center worked primarily at elementary and middle schools in Madison. Kornblum also takes UW-Madison dance movement therapy certificate students to work in these schools.

“What’s special about Hancock Center is that we’ve grown organically. So the need to be in the schools, it was an expressed need from the school, we responded to that need,” said Kornblum.

Kornblum developed the abuse prevention program for schools after seeing kids who experienced trauma and their behavior in turn traumatized other students. In the program, the students learned about

ignoring distraction and when it is or is not acceptable to ignore others. Other themes Kornblum explored with the kids to prevent violence were special awareness, self-regulation, self-assertiveness, redirecting aggression, empathy and anger management. After a few years, Kornblum began to realize not all students related to abuse.

“Everyone could relate to the idea of bullying or teasing. And it was the same body skills. So I changed it to be a violence prevention program,” said Kornblum.

Kornblum explained that sometimes dance movement therapy may work better for some clients than other forms of therapy.

“When serious trauma affects the brain, it causes changes in the brain, and the use of movement can remediate some of these changes in a way talk therapy just can’t do,” said Rena Kornblum.

“I think that in some cases words just aren’t enough,” said LeFeber. “So bringing in the body component of it makes it so much more whole and more rich.”

In the spring semester, certificate students worked at a local elementary school with students who may have benefitted from dance movement therapy. *Photo by Cassie Sterwald*

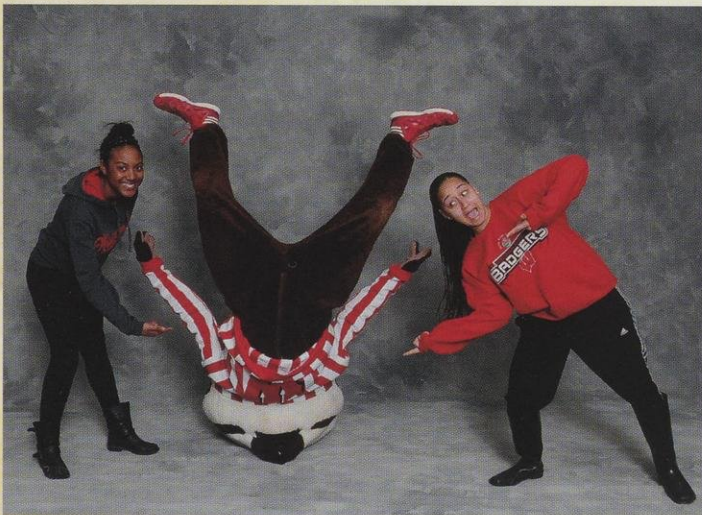

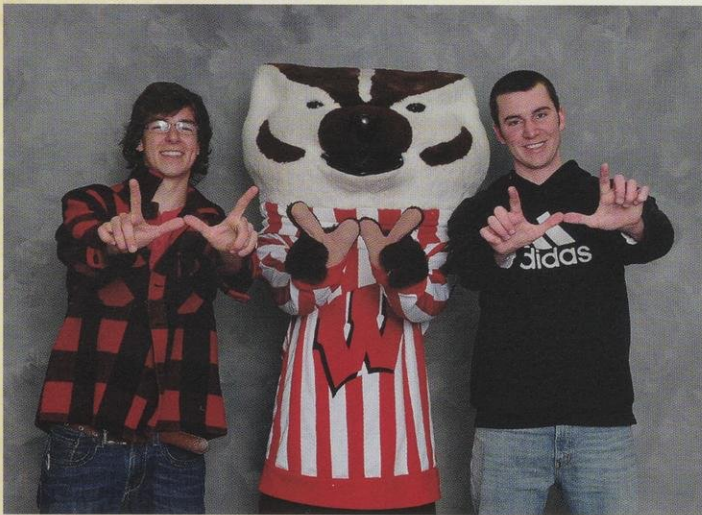

Dance movement therapy uses different props to help control emotions and working on settling. *Photo by Cassie Sterwald*

Day With Bucky

On a blustery day in early March, students gathered for a photo shoot with their favorite mascot, Bucky Badger! With photos taken by Empire Photography, people were able to take silly pictures and pose with Bucky, knowing they would be featured in our Yearbook—they even had the opportunity to buy prints! Bucky teased and played around with participants, mimicking their poses and showing them a few tricks of his own. All-in-all, the event was an unrivaled success!

Fox Alert

Foxes find a home on campus

Written by Cassie Sterwald

In fall of 2013, the song What Does the Fox Say by Ylvis became a huge hit. But that was not the only fox related event this year. Also in fall, foxes were sighted on the UW-Madison campus.

An adult female and an adult male fox first appeared on campus in the fall of 2013. Ecologists predicted that if the pair stuck around, there would be a litter of baby foxes in spring. The first sighting of the baby foxes was on March 31, when someone noticed five of them. Eight total baby foxes were counted in April.

We had a fox family on campus. You might have seen up to eight little foxes playing and rolling in the grass over by the Middleton

building, Van Hise, and the School of Human Ecology. The mother was orange, with a white tail and black feet, and she could be seen around the area. The baby foxes were cute, tiny, and playful things.

The School of Human Ecology started seeking names for the foxes on social media sites, such as Facebook and Twitter. The foxes even had their own Tumblr page!

We attempted to let them live in the area with us, but students and staff had to learn to let them be and just live.

A rope was placed around the den to help protect the foxes by keeping people away, since the area is a busy, classroom- and building-filled area. While they seemed perfectly happy playing right by buildings,

Photo by Keighley Reisenauer

they were still wild animals. If the mother felt unsafe, she could have moved the family.

The young foxes were likely to leave their den in the end of summer to be on their own. The campus had become so interested in these foxes; we found it sad when we no longer saw them over in that area.

The father fox was killed by a car in spring, which is a problem of foxes living in urban habitats.

These foxes have been a kind reminder to UW-Madison students and staff that we are not alone in this world. Students have become fascinated by the foxes and enjoy seeing them play around in the grass. Apparently Badgers can coexist with foxes.

Freedom Week

Written by Cassie Sterwald

UW Freedom Week occurred in the middle of April to raise awareness about modern slavery around the world and to work towards ending slavery. Throughout various countries, there are about 30 million people enslaved in sex, labor and domestic service jobs. Slavery exists in more than 150 countries around the world, including the United States. Eighty percent of these slaves are women and children. The average age of children sold into slavery is 12. Only 1/100,000 victims is ever rescued. Slavery around the world generates an estimated \$32 billion a year.

On April 9, 2014 Force For Freedom held Stand for Freedom, a day-long event aimed toward raising awareness about the issue of modern slavery. Hundreds of universities across the world also participated in this event on their own campuses. Students from Force For Freedom stood in East Campus Mall for 13 hours that day, holding signs saying things like, "I stand for freedom," "One day for their everyday" and "End slavery now." Anyone was welcome to make a sign and join the stand.

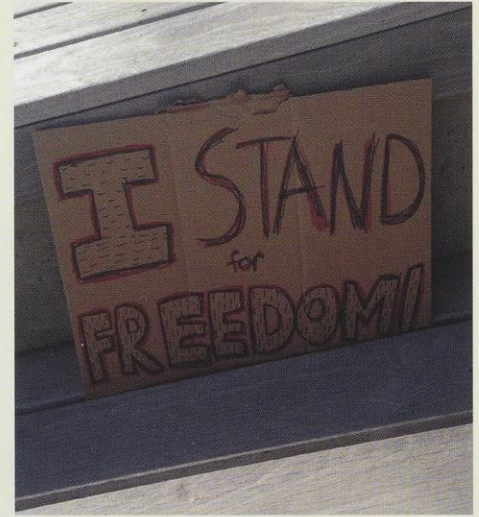

They also created a Wall of Freedom where students donated a dollar to organizations dedicated to stopping modern slavery around the world, and painted their hands and placed their hand print on the wall in order to show a united stand in wanting to end modern slavery.

Other events throughout the week included speakers from different organizations like Tiny Hands and Project Respect. Force For Freedom also pairs with other related student organizations and they put on a spoken word and art night and an all-campus worship night. They also collected gently used women's clothing for trafficking victims in Wisconsin.

Force For Freedom was a student organization and a certified International Justice Mission Campus Chapter. The organization was for anyone interested in learning more about the problem of slavery in the world and for those who wanted to be a part of abolishing slavery in the world.

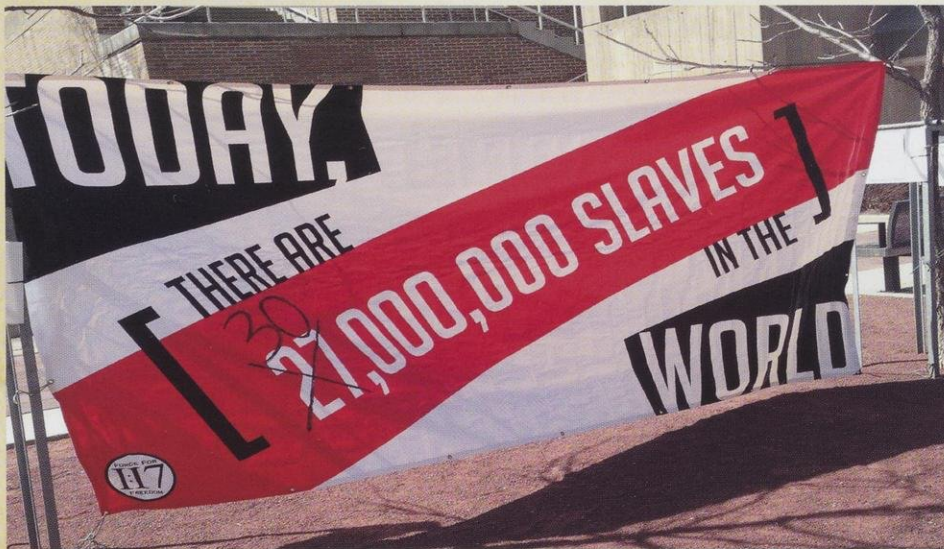

Force For Freedom's mission was "to speak up for those who cannot speak for themselves, for the rights of all who are in

bondage both locally and globally." They wanted to be a resource for education and action. They wanted to both raise awareness to students on campus and partner with other organizations around the world to help educate about modern slavery and to end it.

UW Freedom Week raised awareness about modern slavery around the world and worked to ending slavery.

Photo by Cassie Sterwald

There are 30,000,000 slaves around the world today. UW Freedom Week aimed to raise awareness of this issue to students on campus through several different events and fundraisers.

Photo by Cassie Sterwald

Members of the organization and students stood on East Campus Mall for 13 hours to help raise money to go towards ending modern slavery around the world.

From Golin Harris

Scott Farrell speaks to Ad Club and PRSSA in a joint meeting

Written by Cassie Sterwald

Ad Club and the Public Relations Student Society of America, PRSSA, held a joint meeting at the end of April and brought in speaker Scott Farrell from GolinHarris.

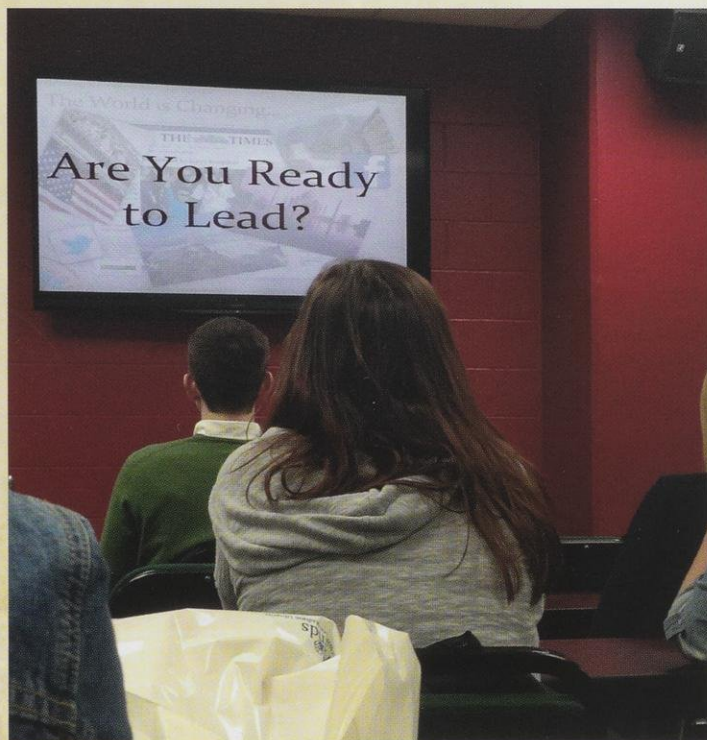

The UW Ad Club holds biweekly meetings with guest speakers and facilitates socials, field trips and creative opportunities for students wishing to gain experience in advertising. PRSSA also holds biweekly meetings during the academic year. These meetings offer networking opportunities and companies, developing PR and communication skills through hands on

activities, and a chance to meet other like-minded students.

Scott Farrell from GolinHarris talked about becoming a leader in a global world. He gave lessons he learned from being in the field. Now that companies are working in a global market, workers have to be prepared to learn about customs and the culture in different countries in order to be successful globally. Farrell encouraged students to take advantage of opportunities they have at the university level, such as studying or working abroad, taking international studies courses and learning languages, and learn more about different cultures, in order

to help them become prepared for jobs in the future. He said the market is constantly becoming more global, and the generation in college now studying advertising and PR will most likely need to work globally in the future.

Ad Club and PRSSA gives students the opportunity to hear from speakers, like Farrell, who share insights into necessary skills students can work on in order to be better prepared for future jobs. Students can network and ask questions from professionals and have the ability to learn a lot about the fields of advertising and public relations.

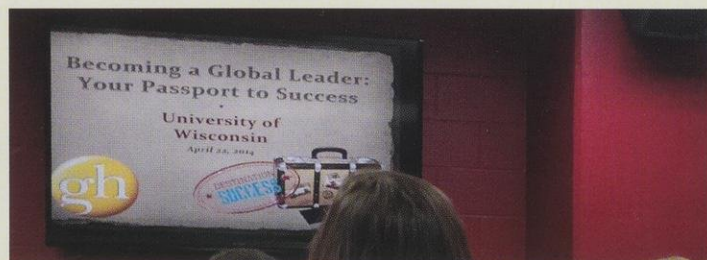

Students were able to hear from someone in the industry about the importance of being able to lead in a global world. They learned lessons and asked questions all about leadership in the public relations and advertising industry.

Photo by Cassie Sterwald

Ad Club and PRSSA's biweekly meetings often bring in guests in their respective fields to talk to student members about what the industry is like. At the end of April, the student organizations held a joint meeting with Scott Farrell of GolinHarris and opened the meeting up to other students from the school of journalism. Scott Farrell is a president at GolinHarris and works in global corporate communications.

"At Golin, we possess the power to inspire and create change. By embracing new technologies and pushing creative boundaries, we help our clients adapt and win in a constantly changing world. We are committed to delivering the deepest insights, boldest ideas and broadest engagement to the world's leading brands through seamless integrated communications."

Israel Film Festival

From February 4th to the 23rd, the UW Hillel partnered with several other Jewish organizations on campus to provide students with the 2014 Israeli Film Festival. This year's theme was "Chaverut: The Celebration of Universal Friendship." The festival focused on showing films that centered around unity and friendship, providing links across cultures and inspiring discussion among movie-goers about the meaning of friendship and universality between people.

Shown at Hillel on Langdon Street, the movies were available for free to anyone who wanted to show up. Chaired by Alanna Koritzinsky and Rebecca Joey Schwab, the film festival committee wrote, "This festival aims to show how friendship overcomes any situation and is visible in any culture. The lesson of mutual respect and understanding is a power that the UW-Madison can use to strengthen cultural and religious divisions. There is power in this art..."

Jungle Kings

Multicultural performance comes to Madison

Rainn Wilson wrote and directed *Jungle Kings*, which was performed as part of the First Annual Multicultural Theatre Festival in celebration of Black History Month by articulating the narratives of history. The play followed the trials and tribulations of Baby Cockroach, a young black man imprisoned for a gang initiation crime, and his struggling conscience before a parole hearing. The Hypnotist worked to shut down Baby's mind, while the Professor fought to encourage Baby away from defeat. *Jungle Kings* showed with a matinee performance on Saturday, Feb. 22, and another evening performance Sunday, Feb. 23 in the Margaret H'Doubler Performance Space in Lathrop Hall.

Before coming to Madison, Wilson worked with "at risk" youth in after school programs and the juvenile prison system. In the program, she described her need to write the play.

"I felt the lovelessness coming from their stories of defeat," she wrote. "I heard their mutilated voices on television, in movies, and inside their music that was about

making money, to buy things, to walk on water, to repair dreams of what they would achieve if the streets named them king."

Jungle Kings featured 10 UW students of color. Their characters reflected societal problems that have caused high rates of incarceration for minorities. In Wisconsin, about 13 percent of African Americans are incarcerated. 1 in 8 black men are in prison, versus 1 in 81 white men. The Multicultural Festival served as a forum to investigate and reflect on these problems.

A table sat center stage with a chair on either side. A prison cell is seen in the back next to graffiti-covered wall and a trash can. In the foreground rested a lone bench. A line of prisoners marched in single file down the staircase and through the audience to center stage. Among them, the Hypnotist was unmistakable. He hollered and belittled each one, calling forth their perceived weaknesses. The play covered themes central to young men who find

themselves oppressed in this way, such as the struggle for identity, power, and respect.

"I hate myself, so I hate everybody else," said Jason Watts, also known as Baby Cockroach. His appeal for freedom in front of the parole officers served as a main source of reflection. Why did he need other gang members to act as surrogate family? What was it that changes a man? How to change? What makes someone helpless, if not a lack of power or money?

Baby Cockroach, along with Cockroach, Monsta, and other prisoners revealed their inner fears to the audience. To not achieve our dreams, to become stuck in a system with no exit, to be forgotten: these were the worries of voices behind bars.

The audience found an ability to engage the performers in a talk-back session after each performance. Perhaps the greatest message, stated near the end of the show, was one that resonated with everyone. "Our deepest fear is not that we are inadequate. Our deepest fear is that we are powerful beyond measure."

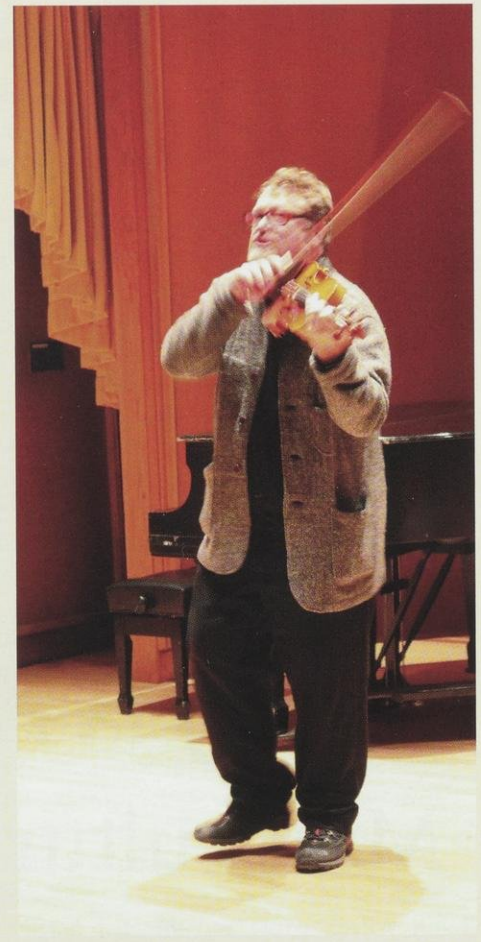

Master Class

Article and Photos by Rebecca Jin

Todd Reynolds was a violinist, composer, educator, and technologist. He combined the classical, traditional violin sound with computer technology and digital loops to create "hybrid" music. This way, he integrated improvised pop, Jazz, and folk music together to create a whole new sound.¹ He was a violin student of Jascha Heifetz, a world class violinist, and was once the principle of the Rochester Philharmonic Orchestra. Additionally, he founded the Ethel band, an amplified string quartet.² A masterclass brought all the students of one studio, as well as other listeners, together to hear fellow classmates play. Generally, three or four students would play a selection of pieces for the audience and the audience would present their critique after the piece(s) were completed. It was a great way to play in a performance environment and to practice the "stress" that may be experienced in front of a live audience.

Moreover, students were better prepared for the end of the semester jury that would rate each student's presentation, then give out a grade based on that performance.

Event attendees included students of Professor Eugene Purdue's studio and to anyone who would have liked to attend the event, regardless of whether they were involved in music at the school. Anthony Cudzinovic, a violin student, commented, "the technology [Reynolds] used was very interesting." I really commended Reynolds' lifestyle choices. He had the opportunity to excel in the Rochester Philharmonic Orchestra, but he turned the opportunity down so that he could pursue a lifestyle of his true passion. His style of music definitely strayed away from traditional classical styles and sounds. He combined and produced modern sounds on a whim, which was impressive, as many musicians of his time had to plan and practice in order to get the sound they wanted.

McCurdy's Friday Night Visit

Written by Seth Huiras

Students and parents filled every table Friday evening in late February, waiting in anticipation, sipping beer and munching on appetizers. When Pat McCurdy walked on stage, cheers and applause filled the air in revelrous joy. McCurdy strummed his way into the hearts of his listeners who joined in the singing, clapping and shouting well into the evening.

McCurdy, known for playing his signature genre of "good drinking music," started with a trademark call-and-response — I'll Be Good to You — followed by I've Got a Reason to Live in which he called out the names of girls in the audience, listing them as his reasons to live. In I'm an Idiot, those who were familiar knew to chime in on cue, pointing at McCurdy and singing, "He's an idiot" for love.

After a short intermission, people cheered from the balcony seats as lone McCurdy, a microphone, and his guitar carried the show

into a second act. McCurdy was never far from stoking the audience's excitement and delivering laughs with a slew of Midwestern references. He also made humor with his music through quoting famous tunes or playing with a mix of genres, some of them invented and improvised on spot.

By the time McCurdy sang Monkey Paw, people started moving near the stage in a delirious and happy state.

"I wish I had a monkey paw! I'd put it in my pocket. I'd like to buy some happiness, but no one seems to stock it!" people sang out with wild gesturing and raucous dancing.

McCurdy wasn't afraid to change up the style, using Gregorian chant, death metal, thrash metal, Barry White, Jamaican, and Justin Bieber variations.

An hour into the show, McCurdy pointed to Jim "Pipe Jim" Schafelburger, the house

disc jockey, who played a random song on cue so that people could join in a dance mix party intermittently while singing on stage with McCurdy. People broke out into sweaty dance moves when McCurdy taught the crowd a groovy choreography in Get Together and Knock Things Over.

In Love Song, things got serious when McCurdy order everyone to take someone's hand and sing to them. It didn't matter whom, as long as you loved them by the end of the song.

By the end of the set, McCurdy had sang his seventh to first favorite songs, and the audience was on its feet, joining a choreography to a crowd favorite, Sex and Beer. After the show, students and parents mingled and were able to purchase his music and T-shirts. With sex on their minds, beer in their bellies and laughter in their hearts, McCurdy fans surely went home with their worries far, far away.

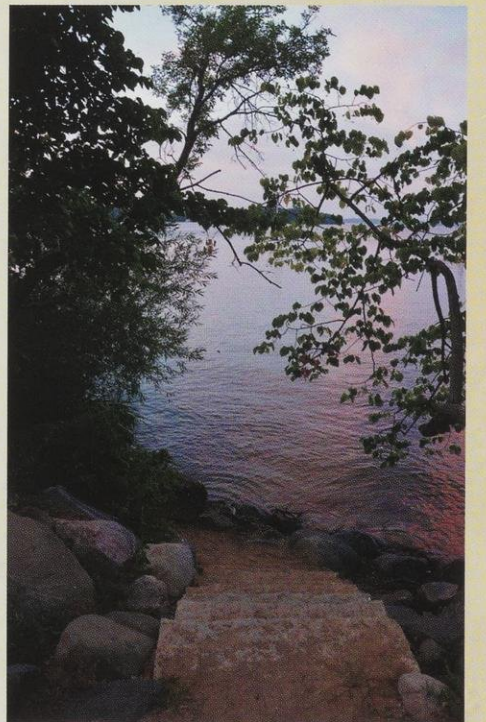

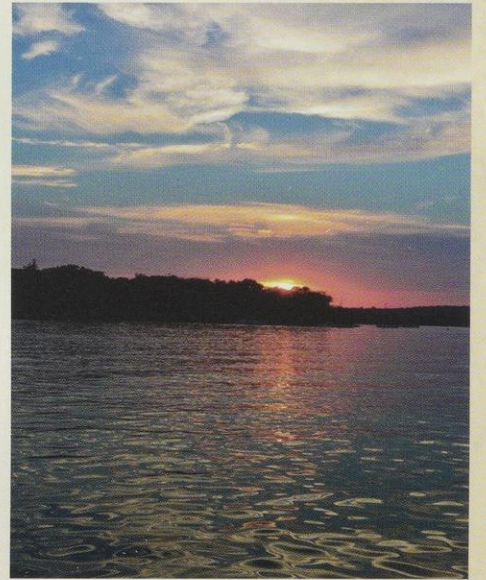

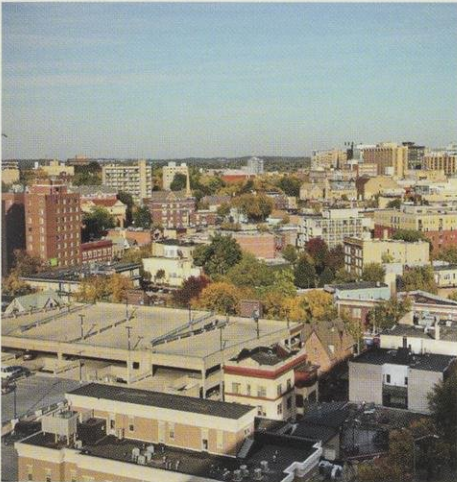

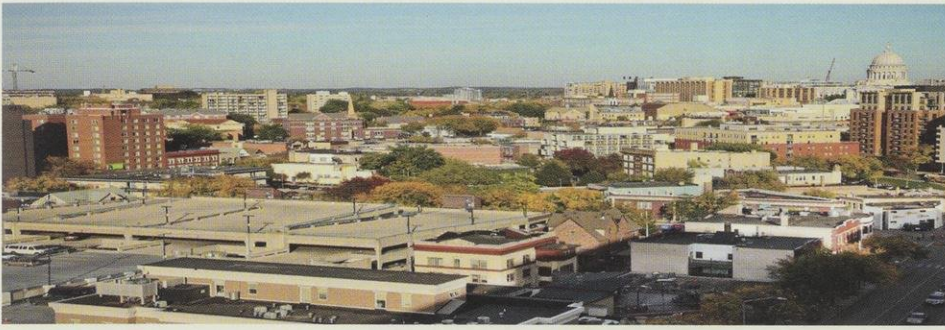

Open Mic Night

Written by Stephanie Gardner

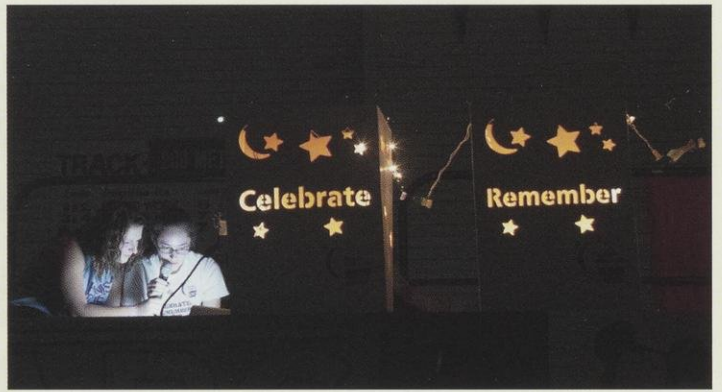

UW Flash Fiction ran an online publication where undergraduates could submit their own work. Poems were reviewed weekly and voted on for best piece and the winner was published on the front page! Additionally, Flash Fiction held monthly open mic nights. UW Flash Fiction presented a phenomenal open mic night at Der Rathskeller—every table surrounding the stage was taken, filled with students and adults alike. An excited

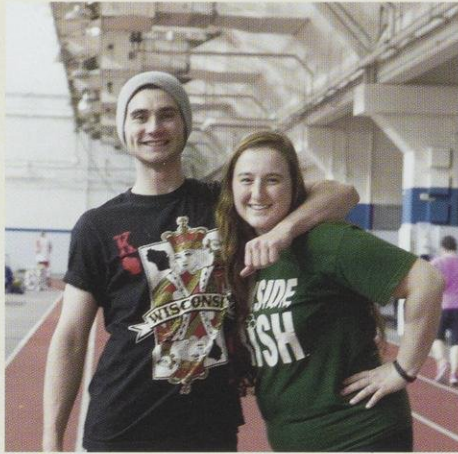

and energetic crowd cheered on a variety of very talented undergraduates who performed their poems for the audience. Students Eli Lynch, Ajanaé Dawkins, Sabrina Ross, and Michael Penn received rousing audience reactions. Even some of the employees at Der Rathskeller got caught up in the performances and watched from behind the counters, their attention speared by the captivating words on stage. Sabrina Ross's poem about becoming a new person, being true to herself and ridding herself of

her old "self" was especially moving and motivating. Michael Penn, one of the many students who rapped, did an amazing job and pumped up the crowd until they went wild for him, even shouting along with him when he hollered his famous line, "If you don't like it you can kill me dead, where I stand, I'll still be the motherf*cking man!" The students who participated in the UW Flash Fiction open mic night outdid themselves, it was a truly amazing experience!

1968 - Using UW developed techniques, the first bone marrow transplant in the United States is performed at the UW Hospital.

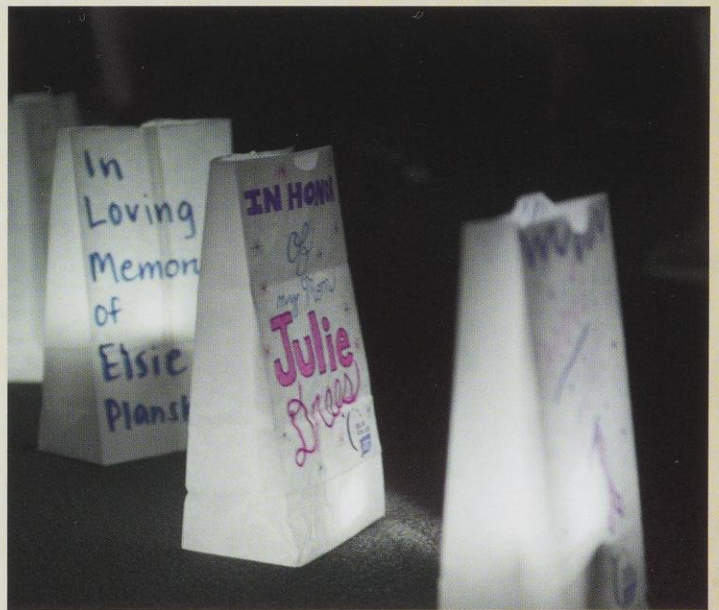

Relay For Life

Written by Eliana Berkoff

In April, Colleges Against Cancer hosted UW-Madison's annual Relay For Life. Nearly 1600 people participated, making this year's Relay the biggest one in the history of the University. Many participants wore t-shirts showcasing the theme of the night: "Finish the Fight." Others had their own team uniforms and found creative

ways to express their dedication to beating cancer. Many people also chose to donate their hair to make wigs for cancer patients going through chemotherapy! Overall, it was an inspiring night and one that will be remembered for the participants and all those affected by cancer.

Study Abroad

Written by Cassie Sterwald

On February 19, 2014 the study abroad department hosted an open house for students hoping to go abroad to learn more about the process and talk to peers who have already gone abroad.

Members of the staff have traveled and studied abroad. Once they returned, they often chose to work with students that wanted to do the same. Peer advisors helped people realize they could study abroad. Oftentimes, students did not think they could travel because of their majors or the cost. The staff at the study abroad department really focused on making people realize they could go abroad, and that there were scholarships and fundraising available.

Peer advisor, Sadie Voet, traveled to

Germany. Her trip made her realize how big the world really is. It was a huge cultural experience and made her want to continue encouraging cross-cultural relationships. Upon her return, she chose to work to encourage interested students interested to study abroad. Studying abroad is an amazing experience, and Voet pushed people to study abroad for as long as possible. If they were considering a year, she encouraged them to follow through with that decision because the experience would be so rewarding.

When talking to students who wanted to study abroad, their reasoning usually came down to exploring and experiencing a new culture. Meeting people within a new culture and creating relationships were just some of the many great things of studying abroad. Some students liked the individual aspect of traveling abroad—rather than

being surrounded by friends and family, a person traveled abroad with a few other UW students. It was an experience that could let an individual really figure out who they are and determine their place in the world.

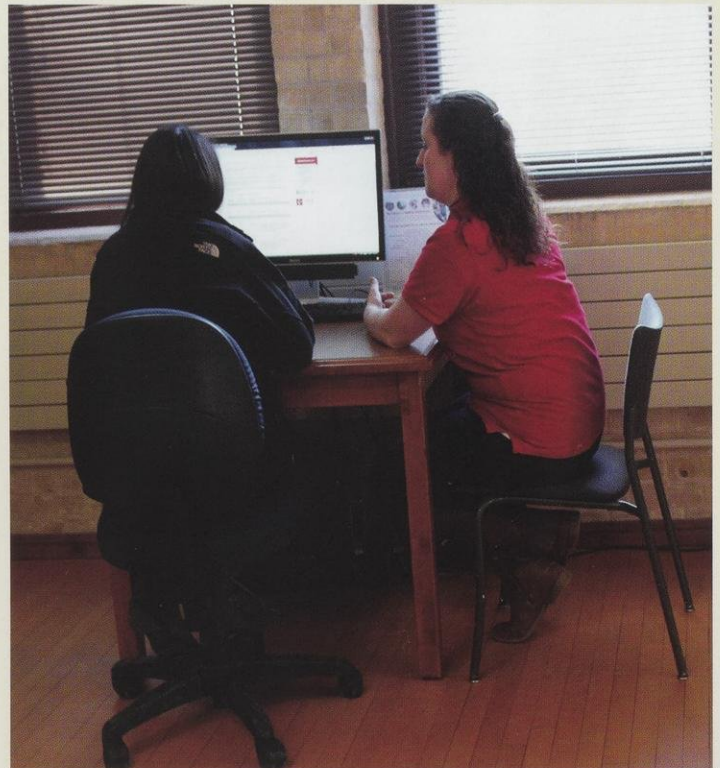

Michelle Koffa, a freshman, hoped to travel to Australia or South Africa at some point in her college career. She thought studying abroad is an important experience because it helps people become global citizens and gain knowledge about different cultures. But it also drives a person to grow up more and become more independent.

Study abroad programs allowed for students to become immersed in a new culture while learning. It really is a once in a lifetime opportunity that interested students should take advantage of.

Diversity in miniature.

Photo by Cassie Sterwald

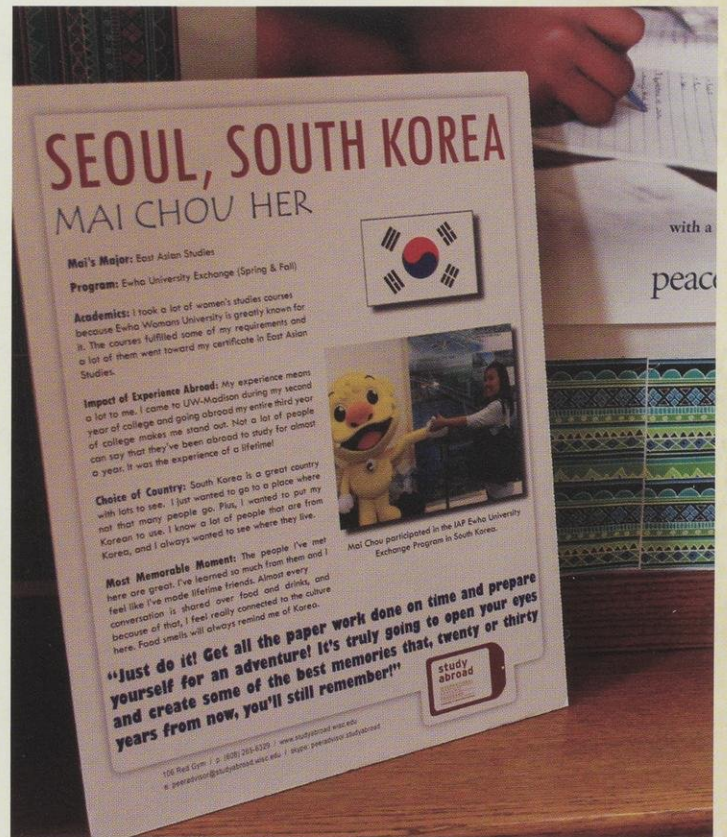

Help organizing and preparing a student for their trip abroad was abundant for those interested.

CSSA

The Chinese Students and Scholars Association at UW-Madison (CSSA), founded in 1989, has established itself as one of the most active and influential Chinese student organizations in promoting Chinese culture and tradition on the UW-Madison campus.

CSSA hosts several annual signature events to serve the Chinese community on campus and in the city of Madison, such as Trip to Devil's Lake and Take Me Out in fall semester, and Spring Festival Gala and Basketball Tournament in spring semester. During the past academic year of 2013-2014, CSSA welcomed new Badgers with New Students Orientations in Beijing, Shanghai and Madison; celebrated Chinese traditional holidays with 500 attendees during Mid-Autumn Festival and more than 1,000 at Spring Festival Gala, for example; originated new programs such as Academic Workshops, collaboration with Independent Learning, Trivia Competition and many more.

CSSA provides not only a harbor for Chinese students to rest and find comfort but also a platform for them to shine. These activities have benefited both Chinese and Madison communities by assisting Chinese students to adapt the new culture and showcasing Chinese culture and tradition. We also endeavor to establish more collaborations with other campus groups, international and domestic, in the future.

Assembly of International Students

The Assembly of International Students (AIS) is a student organization under the International Student Services (ISS). AIS aims to represent the international student body on campus for the purpose of promoting cultural awareness and understanding.

In the past, AIS has been the umbrella organization to connecting all international student organizations on campus, and provided funding for international-related activities.

AIS strives to become an international student government and foster a sense of community among all international students on campus. We will continue to assist their funding needs in strengthening their positive involvement. In addition, we will provide adequate resources and improve general welfare for the international student body.

During the past school year, AIS along with ISS, hosted welcome receptions

in both semesters to provide incoming international students with opportunities to get information on campus from peers and faculty. Our Thanksgiving Movie Night event and the participation during Homecoming Parade acquainted international students with American culture. We have helped numerous organizations with financial support as well as promote their cultural-related events. For the next school year, we are excited to do more!

Ask.Listen.Save.

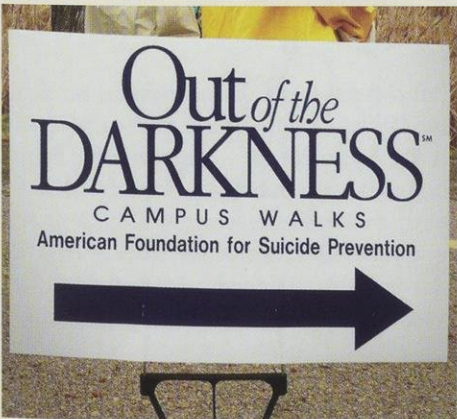

Outreach events and workshops are hosted around campus.

Founded in 2011, Ask.Listen.Save. advocates for the destigmatization of suicidality and mental illness in a campus setting. This student organization hosts outreach events and informative workshops around the University of Wisconsin-Madison in order to better relay the message and awareness of mental health and related issues that are oftentimes misunderstood or kept distant from casual conversation. We hope to construct a healthier college environment by throwing harmful and reductive stigma into oblivion.

Ask.Listen.Save. works to better relay the message and awareness of mental health.

Ask.Listen.Save. participated in a walk to help prevent suicide and raise awareness.

Ask.Listen.Save. wants to construct a healthier campus environment.

Members advocate for the destigmatization of suicidality and mental illness on campus.

Anaguma Eisa

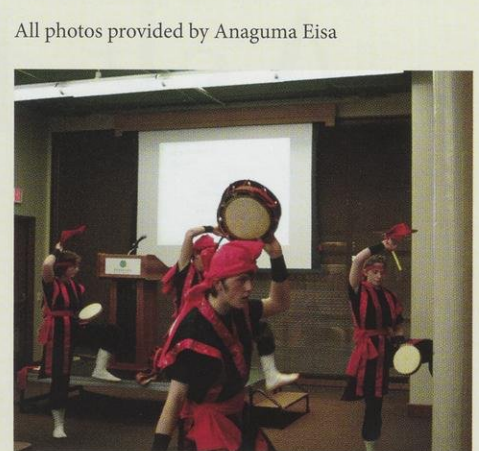

Eisa is a traditional Japanese folk-dance from the Ryukyu islands of southern Japan. It fuses elements of dance and martial arts with Okinawan Music and drumming. Anaguma Eisa's mission is to encourage people of all ages and abilities to develop their full potential through cultural understanding and performing arts. They hope to share this part of Okinawan culture while fostering cultural awareness.

Three types of drums are used in performance: the odaiko, a large barrel drum, the shime-daiko, a medium sized

drum similar to those used in Noh theater, and the paranku, a small hand drum similar to those used in Buddhist ceremonies.

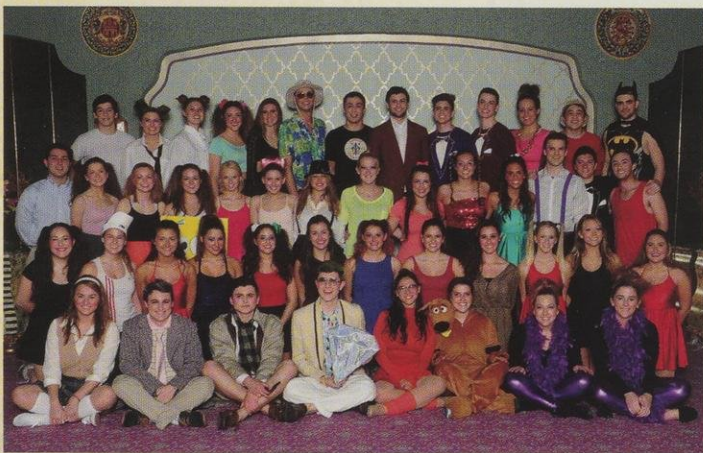

This was Anaguma Eisa's first year on campus, but already they were able to perform for the 12th Annual UW-Madison Japanese Speech Competition sponsored by the East Asian Studies Department.

All of their classes are beginner friendly and are held several days per week to accommodate people's varying schedules. Learn more at <http://anagumaeisa.org>

All photos provided by Anaguma Eisa

Humorology

Humorology, or "Humo" for short, was an annual juried musical/variety show that took place at the Union Theater of the University of Wisconsin-Madison. The competition consisted of original mini musical comedies written, produced, and performed by independent companies which were overseen by a student-run executive board. Beginning in 1948, Humorology was one of the oldest traditions at the University of Wisconsin-Madison and was the largest non-profit student service organization in Wisconsin.

Description taken from <http://humorology.org/>

International Business Student Association

The International Business Student Association (IBSA)/UW-Rotaract is a UW-Madison student organization committed to enhancing its members' business knowledge, networking skills, and leadership abilities while promoting international awareness and service to others. We achieve these goals by taking part in many community service projects—such as volunteering at the Wisconsin Public Television Membership Drive, St. Vinny's Food Pantry, and Relay for Life—fundraising for an HIV/AIDS orphanage in Zimbabwe called Mashambanzou Care Trust, and by taking part in many professional activities such as company site visits, resume workshops, and professional speaker events. We maintain strong partnerships with the Rotary Club of

Downtown Madison and the Edgewood College Rotaract Club to help achieve our goals and to enhance the networking skills of our members. While our organization is affiliated with the Wisconsin School of Business, we welcome all students to join our organization, regardless of their major.

IBSA provides members with networking skills and attending professional activities.

Members take part in various community service projects and fundraisers.

IBSA members work to enhance business knowledge and leadership abilities.

Men's Club Volleyball

After a year of absence from the club sports scene, the men's club volleyball team enjoyed a successful year participating in seven tournaments during the school year from October to April. In October the team kicked off the season with a first and second place win in the Purdue and Marquette Invitationals. Once the team officially received club status in November they were able to participate in the largest tournament of the fall semester, the Michigan State Hardwood Classic, which they took third place in. During the spring

semester, the Big Ten Conference began at the Big Ten Round Robin at Purdue University where the team finished with a record of six wins and three losses. At the Big Ten Championship Tournament at Northwestern University, the team fought their way en route to a third place finish. Additionally, Adam Lepold was honored by being placed on the first All-Big-Ten team.

Keenan Flish and Anatoli Berezovsky were also awarded second team and honorable mention respectively. The final tournament before nationals came at the end of March where the team competed in the MIVA Championships, the largest tournament in the Midwest, where they once again finished third. Off the court players remain busy on their studies as well as helping to coach volleyball at a Madison area high school. In April the club volleyball team will travel to Reno, Nevada to participate in the NCVF National Championships.

Moda Fashion Show

Written by Eliana Berkoff

The MODA Fashion show was put on by MODA Magazine, an affiliate of UW-Madison. Models were chosen to show off clothing that could be worn by anyone on campus—affordable, effortless style that proved one doesn't have to own high-end designer brands in order to look great. Both men and women strutted and stomped down the runway, showing off their fashionable looks. Ultimately, the clothing worn on the catwalk represented a wide range of casual to fancy, giving spectators a wide array of ideas and choices for all of their future closet needs!

During Sexual Assault Awareness Month, PAVE hosted a campaign designed to empower survivors of sexual assault through the use of art as activism.

Our Myth or Fact wheel in honor of Domestic Violence Awareness Month.

"I Support Survivors" campaign as seen on the Madison Metro buses.

PAVE

PAVE (Promoting Awareness, Victim Empowerment) is a registered student organization dedicated to ending sexual assault, intimate partner violence, and stalking on campus through education and activism. PAVE helps students challenge aspects of our culture that blame survivors of sexual assault, intimate partner violence, and stalking. PAVE also strives to achieve social justice on campus by empowering students to support survivors and actively combat the root causes of these serious issues.

In a society where conversations about sexual assault, intimate partner violence, and stalking are often unwelcome and misunderstood, it can be difficult to shatter some of the many misconceptions about these issues. PAVE wants students to understand that these are community issues and that talking about them is the first step toward ending them. PAVE works endlessly to spread awareness about these issues through community and campus-wide campaigns and events. This year PAVE hosted a community-wide bus campaign promoting the importance of intervening in situations that could result in sexual or gender-based violence. Additionally, PAVE offers a 2-credit course (Social Work 672) every semester that gives students thorough training in facilitating educational workshops and supporting survivors.

REthink

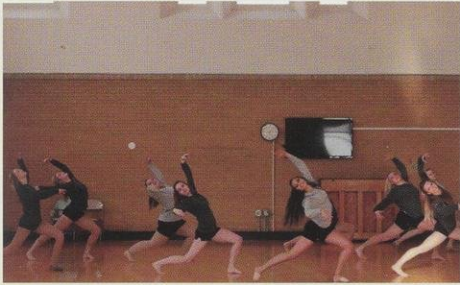

REthink Wisconsin was founded in 2007 in response to the lack of recycling at Camp Randall. In the last seven years, REthink has not only continued to run the recycling program during the football games, but also started a recycling program at the Kohl center during men's and women's basketball and hockey games. REthink's REfill campaign promotes the use of reusable coffee mugs and water bottles. We perform trash audits around campus to educate students and faculty about recycling. An organization favorite is the campaign "Farm Mobbing" where we

travel to local farms and assist farmers with any chores or activities they need help with. This experience is rewarding for all volunteers. Recently REthink started Bottle Free Badgers, a campaign to ban the sale of single-use plastic water bottles on campus. Spring 2014 REthink mentored Greeks Go Green to promote recycling in the Greek system; they're having a great first semester! We are proud of our organization and always welcome new campaigns and members. We look forward to making campus more sustainable and knowledgeable about recycling.

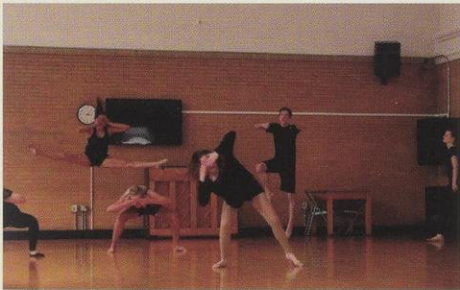

REthink's REfill campaign promotes using reusable water bottles and coffee cups.

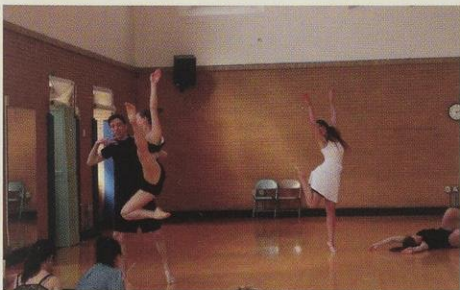

Optima Dance

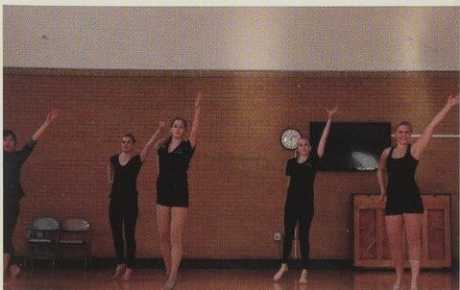

Optima gives student dancers the ability to continue dancing throughout their college years.

All dances are choreographed and performed by student dancers.

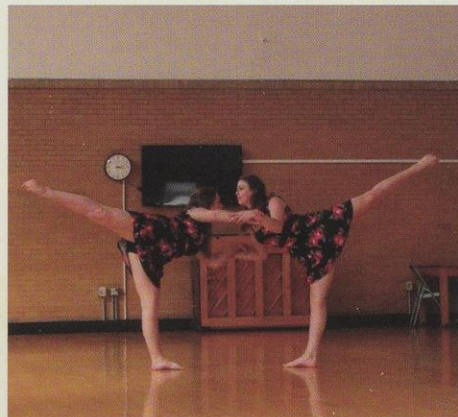

Members have a dress rehearsal prior to the showcase at the end of the semester.

Members also do several fundraisers and community service projects in Madison.

Optima dance is an entirely student run dance organization that gives dancers the opportunity to showcase their own choreography as well as perform in works choreographed by fellow students. An executive board of 10 student dancers works to run the organization and put the shows each semester together. It gives students with different levels of experience and different backgrounds in dance the ability to experiment with all genres of dance. Throughout the semester, Optima offers weekly yoga and technique classes and monthly master classes to its members. Members also can perform and volunteer for different events around Madison.

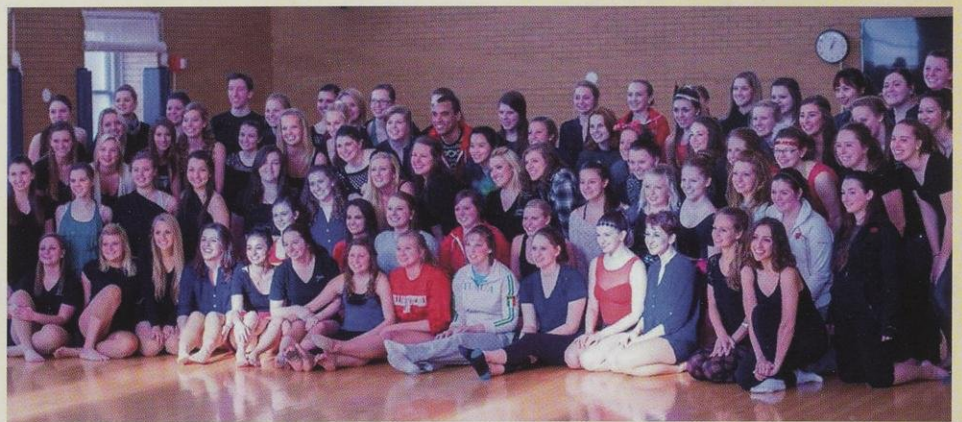

Optima allows students to work together and gain leadership experience.

Optima puts on a showcase each fall and spring semester and the executive board and members work all semester to prepare for these shows. Anyone in the organization is allowed to choreograph a dance in any style, to be in the showcase at the end of the semester. The shows have had everything from ballet, jazz and hip hop to Irish and African dancing. Dances can be large groups, small groups, duets or trios or a solo. Choreographers have rehearsals with their group each week. Throughout the semester, the dances get feedback on their dance and have a dress rehearsal before the show. The dancers learn a finale together to perform at the end of the show. Optima Dance became the largest dance student organization on campus in 2009 and continues to grow each year.

All styles of dance are able to be in the Optima showcases each semester.

Optima doesn't turn any dancer away. All dancers regardless of experience level is welcome to become a member and participate in the two showcases each year.

Optima Spring Showcase

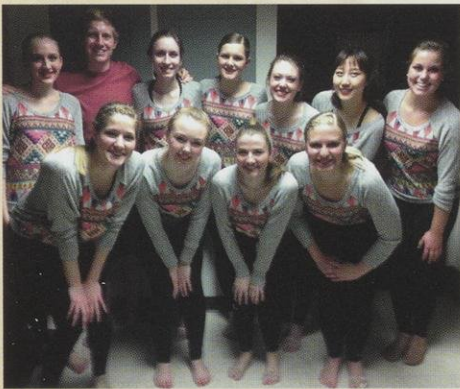

Written by Cassie Sterwald

In mid April, Optima Dance held their annual spring showcase. Three shows were held throughout the weekend at the H'Doubler Performance Space in Lathrop Hall. This semester the student dancers put together a show featuring many popular songs and several styles of dance from hip-hop to jazz, to traditional Irish dancing. The singing group Fundamentally Sound opened the show. There were two acts

full of dancing with a total of 41 dances all choreographed and performed by the students themselves. The spring show included a dance performed by the seniors as their last performance dancing in the organization. Many of the dancers have been a part of this organization since the first semester of their freshman year. These individuals clearly put a lot of time and effort into the dances and had a great time dancing on the stage. The dancers produced a great show for the Madison area.

Optima creates a community and friendships for students who love to dance.

Optima doesn't turn anyone away. Dancers of all skill levels are able to be in Optima.

Choreographers host auditions for their dances and anyone is able to try out.

Dancers learn the dances during the semester and perform them at the showcase.

The three spring shows in Lathrop were successful and all dances and dancers worked hard and had fun, which Optima is all about.

Optima lets anybody choreograph, which gives leadership experience. All members are very supportive of everyone else.

This semester's best costume winner was to a dance titled A Little Party Never Killed Nobody choreographed by Cassie Sterwald.

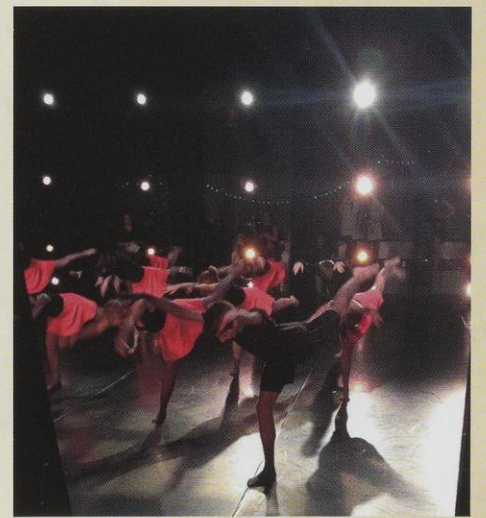

One dance in Optima's showcase was performed to What Doesn't Kill You Makes You Stronger by Kelly Clarkson.

The showcase had everything from solos, duets and large group dances in all different styles of dance.

What Doesn't Kill You Makes You Stronger was based off of Rosie the Riveter and the iconic We Can Do It posters during World War II.

The spring showcase took place in the theater in Lathrop Hall on campus.

Quest Sri Lanka

Written by Charlene Hui

Quest Sri Lanka is a volunteer trip held by Crossing and Sarvodaya, USA, which is the USA office of the largest NGO in Sri Lanka. Different from the government, Sarvodaya focuses on improving the living condition of farmers by non-violence approach, such as self-awareness.

We first volunteered in Suwasetha Nutrition Center, an orphanage in Sarvodaya Headquarter for malnutrition kids. We played games with the children and taught them something about modern technology, such as how to use cameras. Later, we helped with farming works in the orphanage.

The most exciting part of this trip is

Shramadana, a three-day home-stay in host-families, which once benefited from Shramadana. During the three days, we helped the village build a toilet and brushed the activity center to improve their facilities. Also, we taught children some basic knowledge of our home countries and gave them an English class. We exchanged our views of the world with villagers and listened to them talk about the history of their country during teatime everyday. At the end of our home stay, we enjoyed a cultural show where we demonstrated what we thought could represent America while they demonstrated what they thought could represent Sri Lanka.

In the Sarvodaya organic farm, we planted aloe and listened to a lecture related to

agricultural Economics and another regarding kidney disease, both of which presented some of the problems that Sri Lanka is facing.

In the last three days, we volunteered in the Turtle Hatchery in Kosgoda. We dug new-hatched turtles in sand and found nearly forty baby turtles. We went to the beach to find seaweed for baby turtles as well and in the evening, we sent some baby turtles back to the ocean. Besides, we cleaned all the tanks and even washed adult turtles. We also shared what we had learned from our work to other tourists when we were free.

As for sightseeing, we visited the Stupa and Boo tree in Anuradhapura, Dambulla cave Temple in Kandy, and rode on elephants.

Wisco High Five Crew

The Wisco High Five Crew began smacking hands and lifting spirits in the spring of 2012. Since then the "Crew" has grown to become one of the largest student organizations at UW-Madison. The WHFC and its officers plan community-based outreach projects that have included collection donations, supporting cancer survivors and families during Relay for Life, initiated a fund to assist American Family Children's Hospital, academic initiatives around campus, and of course, High-Fiving. The Wisco High Five Crew operates without funding and is a great resume builder and a lot of fun!

Wisco High Five Crew members give free high fives as well as do community service.

Getting a high five from a stranger does brighten this student on his way to class.

While it is a newer student organization, Wisco High Five Crew has grown to be one of UW-Madison's largest student organizations.

Wisco High Five Crew members meet at locations on campus to spread happiness and lift spirits by giving high-fives.

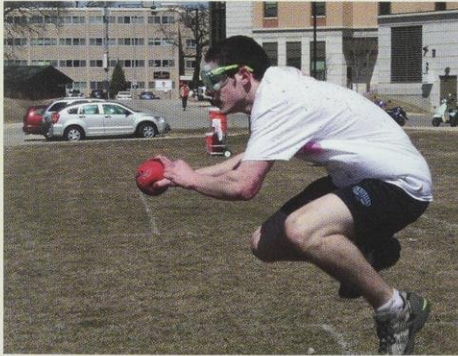

Dodge for a Cause is one of WASB's core events on campus every year.

WASB

The Wisconsin Alumni Student Board (WASB) is a non-profit student organization sponsored by the Wisconsin Alumni Association. Founded in 1979 by Gayle Langer, the Associate Executive Director for the Alumni Association, WASB began with approximately 20 students and was focused on the annual Founders' Day

events. Today, the Wisconsin Alumni Student Board retains 65 active members and new members are selected every semester through an interview process. Each member is assigned to an event, marketing, or sponsorship team. WASBs core events include Dinners on Wisconsin!, All-Campus Party, and Dodge for a Cause. Geared toward linking students of the past, present and future, the Wisconsin Alumni Student Board has one centralized purpose – celebrating the University of Wisconsin-Madison.

WASB is geared toward linking students to the past, present and future.

Each member is assigned to the event, marketing or sponsorship teams.

WCC

The Wisconsin Consulting Club (WCC) was founded in 2006 as the only organization to offer students the resources and support necessary to enter the consulting industry. We continue to be the only organization that provides this to students.

The WCC is driven to demonstrate that the University of Wisconsin-Madison is an elite recruiting ground for consulting firms. Over the years, our reputation for excellence and high performance has earned us the recognition of our peers and stakeholders.

Our intelligence and passion, structured approach to personal development and the strength of our networks has continued to show high-performance by club members. This has laid the framework for their successful careers in the consulting industry. Strategic objectives of WCC include: increasing awareness of consulting as a profession, encouraging students to pro-actively and sufficiently prepare for a career in the field and achieving a high-level of performance and confidence in case interviewing and other technical skills required for success. We also aim to expand the professional network of WCC and its members, create a social and supportive club culture so that WCC alumni will continue to support our club development and actively promote the WCC brand to their firms in placing our members in top positions within the consulting industry.

WCC wants to increase awareness of consulting as a profession and prepare students for the field of consulting.

Members have the opportunity to attend conferences and network with professionals.

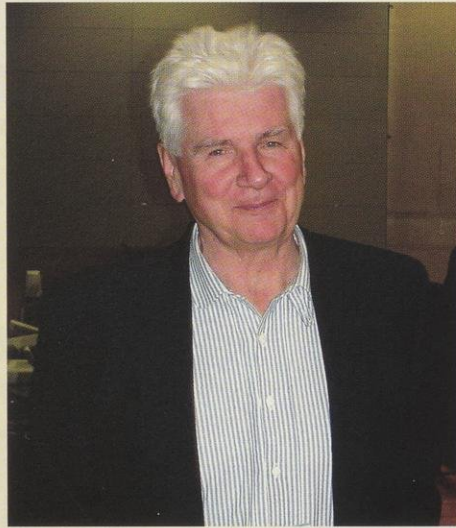

WCC offers members resources and support to enter the consulting industry.

Members of Delta Gamma, a Panhellenic Association, attend the annual Trick-or-Treat with the Greeks event.

Greek Life

Rushing, pledging, and hopefully becoming a member of one of the great fraternities or sororities on campus was a dream many students had upon entering UW. For many, that dream was realized in the form of lifelong bonds of brotherhood and sisterhood and grounded in Greek letters. Between annual events, philanthropy, academia, and parties, the life of Greek students was a busy one! This large segment of the UW population made Langdon (and surrounding areas) a great place to be a Badger.

Members of Zeta Beta Tau, an Interfraternity Council chapter, participate in their "Get on the Ball" Philanthropy Event.

2003 - The University of Wisconsin Foundation launches the public phase of "Create the Future: The Wisconsin Campaign," the most ambitious fundraising effort in the university's history.

Life on Langdon

ΑΧΩ

Alpha Chi Omega

Wisconsin Founding Date:
December 18, 1903

Campus Address:
152 Langdon Street

Philanthropy Chair:
Tessa Coan

Website:
<https://win.wisc.edu/organization/alphachiomega>

Being the largest house on campus, girls were offered a great place to call home. Whether you played sports, danced, painted or sung, there was something for you. Involved in every aspect of the University, Alpha Chi Omega offered its new members opportunities in philanthropic and homecoming chair positions. The women of Alpha Chi Omega were among the most visible and active members both inside and outside the Greek system. From representation on the Panhellenic Council and Judicial Board to involvement within the Wisconsin Alumni Association, women of Alpha Chi Omega were strongly valued and encouraged. Girls from all different backgrounds came together and strove to apply the strength of their sisterhood within their house, the Greek system, the University campus and the community. The women of this sorority were proud of the traditions they built on the campus and their legacy would continue for over 100 years.

ΑΕΦ

Alpha Epsilon Phi

Wisconsin Founding Date:

Campus Address:
220 E. Lakelawn Place

President:
Nicolette Codispoti

Website:
<https://win.wisc.edu/organization/aephi>

Alpha Epsilon Phi is a national sorority, founded October 24, 1909, by seven Jewish women, dedicated to helping women become the best they can be. These seven women were searching for a group of young women that would contribute to the growth of its members emotionally, intellectually and socially. We are a sorority that strives to inspire and support exemplary women dedicated to friendship and a lifelong commitment to sisterhood, while building on the vision of our founders. We prize individuality, encouraging each member to discover and develop the talents and abilities that make her unique. But just as we value individuality, we also prize togetherness, fostering friendships and a sense of belonging. When becoming a part of AEPHI, you are not just becoming a member of a sorority; you are becoming a sister in a family, full of love, trust and understanding that lasts a lifetime.

Elizabeth Glaser was a member of Alpha Epsilon Phi- Sigma Chapter at the University of Wisconsin – Madison. She was a major American AIDS activist and child advocate married to actor and director Paul Michael Glaser. She contracted HIV very early in the modern AIDS epidemic after receiving an HIV-contaminated blood transfusion in 1981 while giving birth. Like other HIV-infected mothers, Glaser unknowingly passed the virus to her infant daughter, Ariel, through breastfeeding. Ariel died in 1988. The Glasers' son, Jake, born in 1984, contracted HIV from his mother in utero, but has lived into adulthood. Glaser died in 1994. Mourning the loss of her daughter and determined to save her surviving child, Jake, along with other HIV-positive children, Glaser co-founded the Elizabeth Glaser Pediatric AIDS Foundation in her kitchen in 1988. Glaser's work raised public awareness about HIV infection in children and spurred funding for the development of pediatric AIDS drugs as well as research into mother-to-child transmission (MTCT) of HIV. (Significantly, Glaser's children received the virus through two of the most common means of mother-to-child transmission.) The foundation is a major force in funding the study of pediatric HIV issues and tackling juvenile AIDS, both domestically and globally. Her book *In the Absence of Angels* (1991) is noted for its sensitive communication of the pain of the loss of a child and the intrusion of the media on a mother's grief. Elizabeth left such a legacy with the Alpha Epsilon Phi community that the Elizabeth Glaser Pediatric AIDS Foundation became one of our two national philanthropies. Not only is the Elizabeth Glaser Pediatric AIDS Foundation special to us because it is one of national philanthropies, but it also holds a special place in our hearts here in Madison because she was a member of our chapter.

AΩE

Alpha Omega Epsilon

Wisconsin Founding Date:
December 12th, 2004

Campus Address:
1550 Engineering Drive

President:
Ashley Stubbe

Website:

Alpha Omega Epsilon is UW-Madison's only sorority for women studying technical science and engineering. The sorority was founded in 1983 at Marquette University, and the Omicron Chapter here at UW-Madison was installed in 2004. We are founded on three key pillars: philanthropy, social and professional, and hold events throughout the semester that support those goals, such as volunteering at Second Harvest Food bank, participating in the Homecoming festivities and attending talks from professionals in the industry. Currently, we have 38 active sisters and whopping 17 women in our candidate class. Although we don't have an official house on campus, we consider Engineering Centers Building to be our "home-base." This semester we are excited to be introducing so many new women to our sorority, and we are gearing up for our 10th anniversary in December!

Alpha Phi

Formed from true and loving friendships, Alpha Phi members created a lifelong sisterhood. Their values rested on promoting sisterhood, service, loyalty, character development and leadership.

Delta Delta Delta

Wisconsin Founding Date:
April 1, 1898

Campus Address:
120 Langdon Street

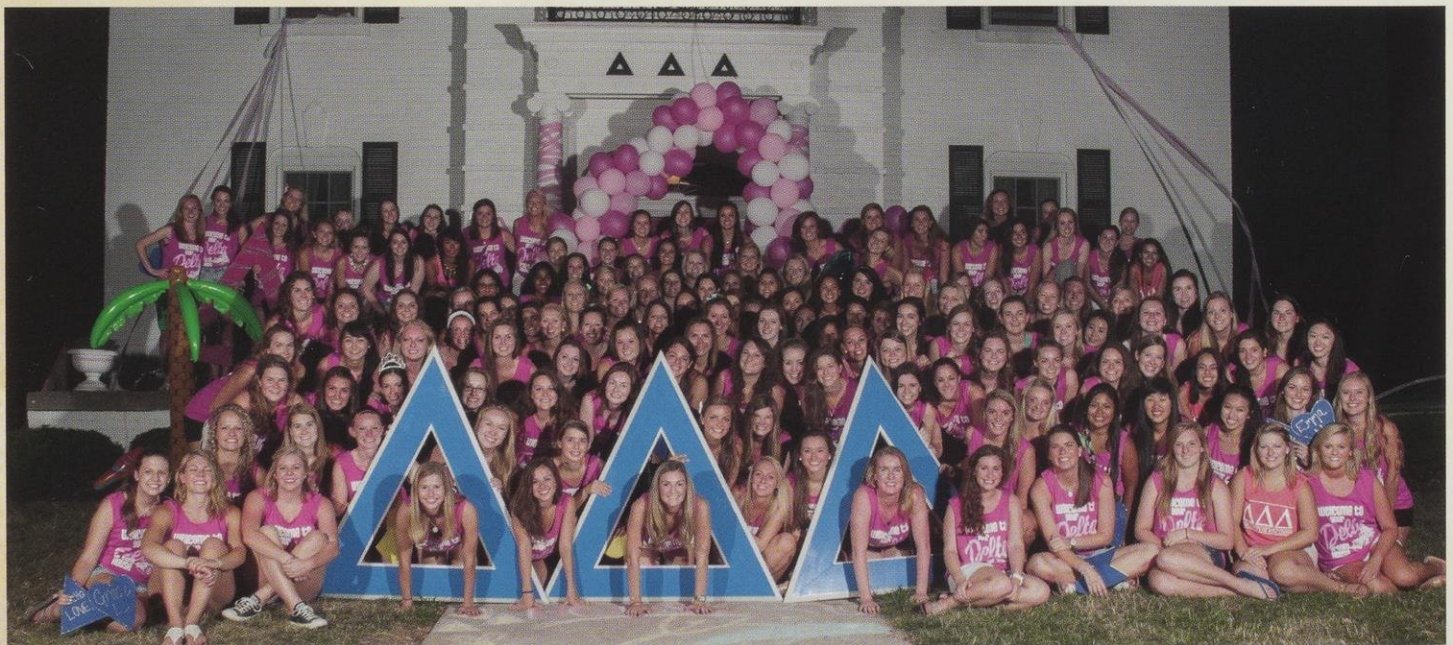

President:
Abbey Suslavich

Website:
<https://www.facebook.com/UWTriDelta>

The purpose of Delta Delta Delta shall be to establish a perpetual bond of friendship among its members, develop a stronger and more womanly character, to broaden the moral and intellectual life, and to assist its members in every possible way. Our chapter is very diverse with women from all over this country and with majors from every college here at the University of Wisconsin-Madison. Tri Delta prides itself on being the first women's fraternity established without the help of men. We have three philanthropies every year Cakes for Kids, a pancake breakfast, Sincerely Yours, a letter-writing campaign, and our newest event Delta Dodge ball, a dodge ball tournament. All of these events benefit St. Jude Children's Research Hospital. In the past spring and fall, the UW-Madison Tri Delta chapter raised 48,000 dollars for St. Jude! All of this and more makes being a Tri Delta sister an important part of the collegiate experience. The bond of friendship and loyalty between the sisters of Delta Delta Delta is something we will all treasure now and for the rest of our lives

Fun fact:

Meryl Davis, 2014 Olympic Gold Medalist Ice Dancer, is an alumni of Delta Delta Delta at University of Michigan

Delta Gamma

Delta Gamma is an active, involved, and growing member of the UW Greek community. We aim to create an accepting, value-based environment that enables our members to reach their fullest potential as individuals and as members of a larger campus and national organization. This year, the chapter is composed of 169 diverse women who form genuine, life-long friendships that last far beyond the undergraduate experience. Our members are active in our foundation through our service work with Wisconsin Council of the Blind and Visually Impaired, OccuPaws Guide Dog Association, and our national philanthropy, Service for Sight. Our members can be seen actively participating in the larger Greek, campus, and Madison communities through service, social, and scholastic involvement. This school year already, the women of Delta Gamma have been involved with events such as the UW Homecoming Week Campus Clean-Up, Trick-or-Treat with the Greeks, and other chapters' philanthropy events. With that, we always strive to live up to our fraternity's motto: "Do Good".

Historical, Interesting Fact: Delta Gamma is the only Panhellenic group to have its flower registered with the American Rose Society: the Delta Gamma Cream Rose

Athletics Highlights

If there was one thing we Badgers prided ourselves on, it was our school spirit surrounding our athletes. From scoring touchdowns to nothin' but net, our Big Ten teams made the University proud with their accomplishments on and off the field. This section focuses on some of the great moments from our 2013-2014 teams, especially throwing some of our greatest achievements from this year into the spotlight and onto our annual scoreboard. If you want to be a Badger, just come along and dive into the wonderful world of athletics!

Photo by Hayley Cleghorn

Photo by Rebecca Jin

March 8, 1947 - UW defeated Purdue to win the Big Ten Conference basketball championship.

#23 Wisconsin 45, UMass 0

In head coach Gary Andersen's debut at the helm of the Wisconsin football program, the Badgers proved that a new leader on the sidelines didn't mean a change in the team's philosophy on the field: run the ball, run the ball and run it some more. UW routed UMass 45-0, scoring in each of the game's four quarters. Running back Melvin Gordon led the attack with 13 carries for 146 yards and one touchdown, while Joel Stave added 197 yards in the air, completing nine of his 17 passes and tossing two touchdowns. Wisconsin held

the Minutemen to just 212 total yards of offense and countered with nearly 600 yards of its own.

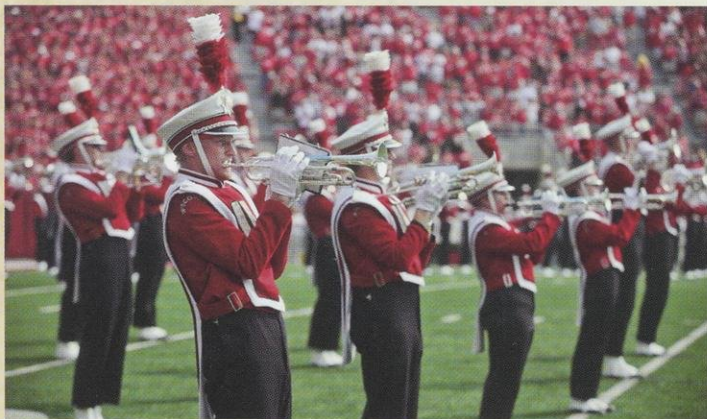

Photo by Claire Larkins

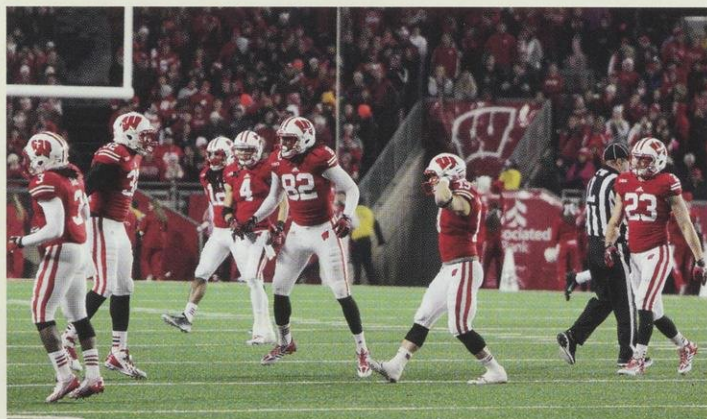

Photo by Aaron Redlich

#21 Wisconsin 48, Tennessee Tech 0

After dominating UMass in the opener, Wisconsin picked up right where it left off in second game of the season, gathering its second-straight shutout in a 48-0 blowout of Tennessee Tech. It was just the second time in school history UW had opened a season with back-to-back shutouts. The Badgers surpassed their 597 yards of game-one offense by putting up 606 yards against the Golden Eagles. To make the performance even more impressive, UW allowed fewer yards on defense than it did in the first game, giving up just 113 yards.

Photo by Claire Larkins

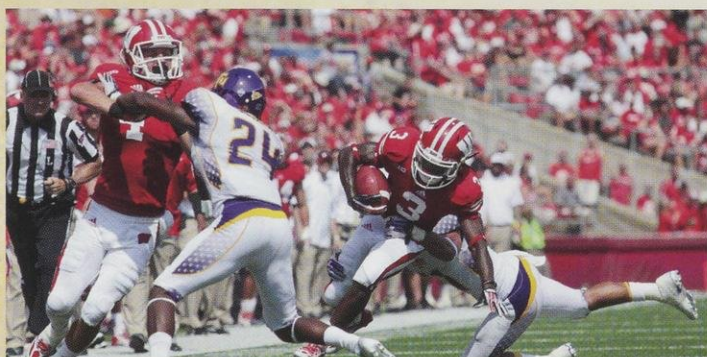

Photo by Claire Larkins

Photo by Claire Larkins

Arizona State 32, #20 Wisconsin 30

Wisconsin was robbed of a chance to kick a last-second field goal and start the season 3-0 due to a highly controversial call after the Badgers, down two points with 1:36 remaining in the contest, drove 70 yards to the 13-yard line of the Sun Devils. Joel Stave hiked the ball with 18 seconds left on the clock, shifted to the center of the

field and took a knee, setting up kicker Kyle French for a chip shot. As the clock continued to tick, the ball Stave placed on the field was leapt on and covered by an Arizona State player, preventing the referee from swiftly repositioning it and allowing play to resume. By the time the ASU player removed himself from his bear hug with

the pigskin and the official signaled the ball to be snapped, time had expired and the Badgers had come up short. An unfair ending to a great game overshadowed Wisconsin's hard-nosed performance against a tough opponent on the road in this desert heartbreaker.

Photo by Aaron Redlich

#24 Wisconsin 41, Purdue 10

Despite the prior week's demoralizing defeat, the Badgers returned home to Camp Randall to win its first conference game of the season, 48-10, over Purdue. The Wisconsin backfield continued to destroy opposing defenses, as Melvin Gordon, James White and Corey Clement combined for 375 yards on the ground, 49 yards in the air and five touchdowns. UW recorded its third game in four tries of gaining 546 yards or more on offense and allowing 212 yards or less on defense. Chris Borland was solid at linebacker, making six tackles and breaking up one pass. Joel Stave went for 158 yards and an interception and Jared Abbrederis snagged seven passes for 94 yards in the win.

#4 Ohio State 31, #23 Wisconsin 24

A late-game comeback by the Badgers was thwarted by the hard-hitting Ohio State defense in Wisconsin's 31-24 loss at Ohio Stadium. UW entered the fourth quarter down 16 points, but got within one score in the game. Unfortunately a costly 40-yard catch and touchdown by OSU wide receiver Philly Brown and a Joel Stave interception, leading to an easy Buckeyes touchdown was the difference in the game. Wisconsin linebacker Chris Borland did all he could to keep his team in the game, tying a career-high and leading all defenders with 16 tackles. The Badgers outgained Ohio State on offense, including 295 yards passing, but unlike previous contests, were unable to have as much success running the ball. Melvin Gordon carried the ball 15 times for 74 yards, while James White ran eight times for just 31 yards. Jared Abbrederis snagged 10 passes for 207 yards and a score.

Photo by Aaron Redlich

Photo by Aaron Redlich

Photo by Aaron Redlich

Wisconsin 35, #19 Northwestern 6

On homecoming weekend in Madison, Wisconsin provided current students, alumni and fans alike with an impressive 35-6 victory against conference foe Northwestern who entered the game ranked No. 19 in the country. The result gave UW a 134-10 advantage in points scored at home compared to its opponent in the four games played at Camp Randall. The Badgers got their offense back on track, as the team gained 527 yards with the ball. Big plays by Melvin Gordon and Jared Abbrederis put Wisconsin on top 21-6 at halftime. Abbrederis caught a 63-yard touchdown pass in the first quarter, which was eclipsed by Gordon's 71-yard run and score in the second frame. The Badgers defense forced five NU turnovers and sacked Wildcats quarterbacks Kain Colter and Trevor Siemian seven times by seven different players—the most since 2001. Sojourn Shelton recorded three tackles and an interception and Chris Borland had 10 tackles and a sack.

#25 Wisconsin 56, Illinois 32

Melvin Gordon reached 1,000 yards rushing on the season in Wisconsin's 56-32 rout of Illinois, giving the Badgers a 1,000-yard rusher for the ninth-straight season. UW went on top 21-0 after one quarter and never looked back. Gordon, James White and Corey Clement combined to record seven of the team's eight touchdowns. Joel Stave contributed 189 yards and two touchdowns on 16-of-21 passing. After Chris Borland went down with an injury

early in the contest, backup Marcus Trotter stepped in and registered a team-high nine tackles and recovered a fumble. Despite getting within 11 points before halftime, the Fighting Illini were unable to continue their comeback following the break in play. UW held U of I to just 72 yards on the ground, while the Badgers picked up 289 themselves. With the win, Wisconsin handed Illinois its 16th-straight Big Ten loss.

Men's Basketball

30-8 Overall. 12-6 Conference. Final. Four. The UW-Madison Men's Basketball team slam-dunked their way into one of the greatest seasons that they've seen in years. With team members like Frank Kaminsky, Josh Gasser, Sam Dekker, Nigel Hayes, and Ben Brust, the boys in red battled their way

to the Final Four during March Madness. By beating out Oregon, Baylor, and Arizona, the Badgers found glory and a newfound fan fervor in their journey through the conference. Frank Kaminsky, in particular, became a star for UW-Madison. Starting and playing in all 38 games of the season,

he averaged 13.9 points per game, earning him a career high. He even broke the school record against North Dakota, scoring a total of 43 points. Ultimately, the Badgers rocked the season, renewing the students' and alumni's passion for basketball and making their mark on college sports.

1994 - The Badgers win their first Rose Bowl, beating UCLA.

Men's Soccer

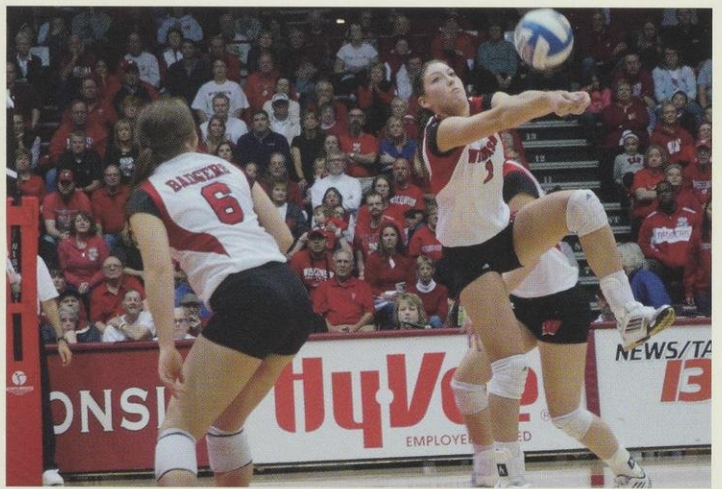

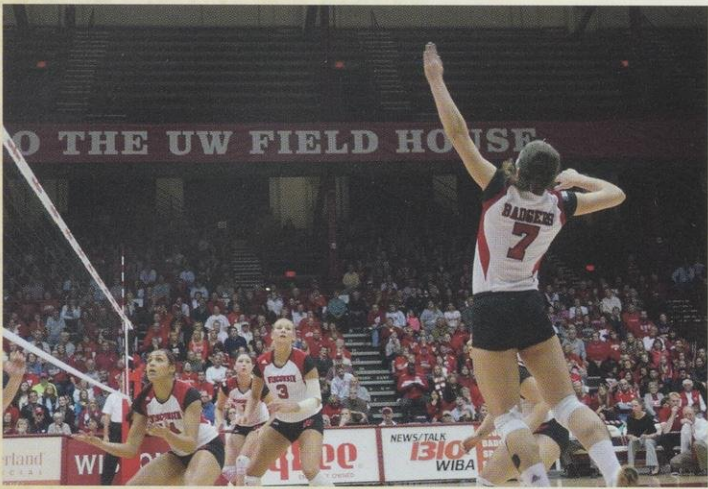

The Wisconsin men's soccer team followed its dismal 2012 season with a remarkable campaign in 2013, which included earning an NCAA tournament berth for the first time since 1995, posting the fifth most wins in program history (14) and extending a home unbeaten streak longer than any other team in the country (14). The Badgers came out of the gates hot, winning five out of their first six games. On Oct. 11, in one of the most memorable comeback victories in McClimmon Complex history, UW took down reigning national champion Indiana. Wisconsin netted three goals in a 25-minute span to seal just the fifth win all-time against the Hoosiers. The team finished 4-2-0 in the Big Ten, earning the No. 2 seed for the conference tournament for just the fifth time in the 21-year history of the Big Ten men's soccer tournament. But avenging a late regular season defeat at the hands of Wisconsin, seventh-seeded Northwestern narrowly eliminated the Badgers from Big Ten tournament contention on a chilly night in Columbus, Ohio. Despite the loss, the Badgers were awarded a home match against familiar foe Milwaukee in the first round of the NCAA tournament, snapping an 18-year absence from the Big Dance. The Badgers completed an undefeated home slate with a 1-0 win against the Panthers, giving Wisconsin the longest active NCAA win streak (six)—a stretch in which the Badgers posted six consecutive shutouts—and extended the nation's longest active home unbeaten streak to 14 matches, which will be carried over into its third season in 2014. On Nov. 24, Wisconsin travelled to South Bend, Ind., to take on third-seeded Notre Dame in the NCAA tournament's round of 32. Unfortunately the quick, explosive play of the Fighting Irish was too much for the Badgers, as they lost 4-0. Although it was a bitter end to a memorable season, there's much praise to give and potential to look forward to within the Wisconsin men's soccer program.

Graduates 2013-2014

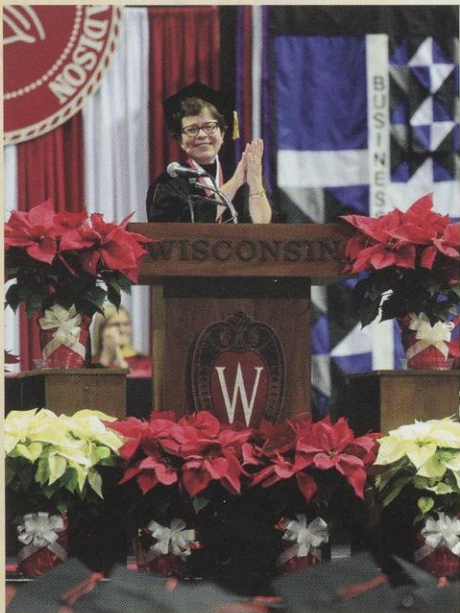

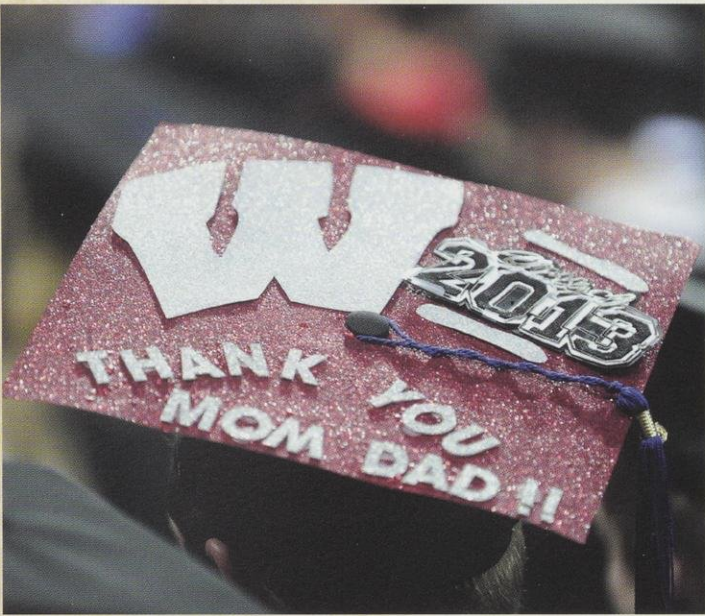

For the first time in over two decades, the Spring Commencement Ceremony was held at Camp Randall, instead of the Kohl Center. May 17, 2014 proved to be a staggering success, not just in terms of the beautiful weather, but also the eloquent and engaging keynote speaker, Jon Huntsman. Between “Jump Around” playing at the beginning of the “4th Quarter” of the ceremony and the marvel of stepping back into an age-old tradition, Graduation was a day to be remembered and cherished.

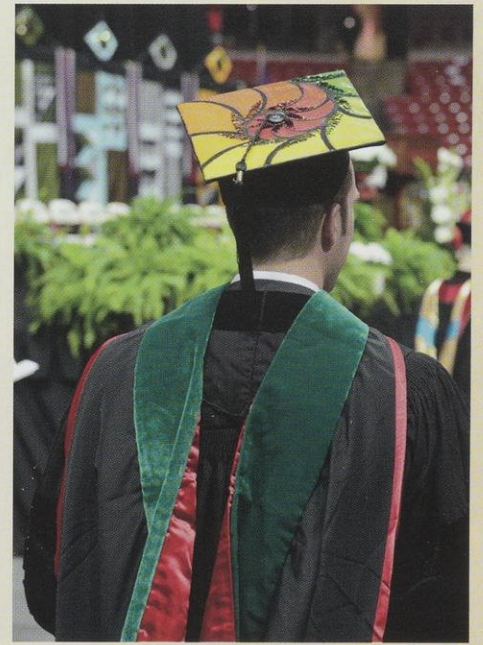

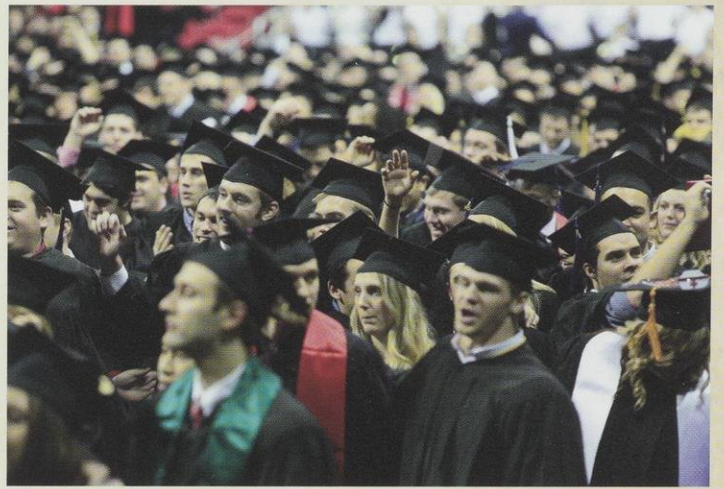

We also give a special thanks to Empire Photography for providing photography both at the ceremony and for the graduates’ pictures in our book!

All photos in this section by Empire Photography.

December 3, 2011 - Wisconsin defeats Michigan State to win the first ever Big Ten Football Championship Game.

Graduates '13-'14

The following is a list of the newest alumni of the University of Wisconsin-Madison during the 2013-2014 academic year, including summer 2013 graduates. A student's name being on this list does not guarantee that the student did indeed graduate.

Summer '13

MASTERS

Jordan Leslie Okel Adams
Art
 Deepak Agarwal
Electrical Engineering
 Geomyoung Ahn
Cellular and Molecular Biology
 Oguz Akkas
Industrial Engineering
 Abdulla Abdulaziz Alhajri
Nuclear Engineering and Engineering Physics
 Abdullah Hamad Alsabhan
Civil and Environmental Engineering
 Bryan James Althouse
Freshwater and Marine Science
 Robin Lee Amado
Library and Information Studies
 Amita Anand
Electrical Engineering
 Prachi Arora
Social and Administrative Sciences in Pharmacy
 Chuanchom Aumnate
Mechanical Engineering
 Jacob Aaron Backhaus

Phillips Medisize

Partnerships Built on Innovation

We Believe In, and Invest In, Our People

Phillips-Medisize is a leading global outsource provider of design and manufacturing services to the medical (medical device, diagnostics, and drug delivery products) and commercial (automotive, consumer and defense) markets. The company has annual sales over \$500 million with 75% of the total revenue coming from drug delivery, medical device and diagnostic products.

Our core advantage is the knowledge of our people to integrate design, molding, and automation to drive low cost and high quality manufacturing solutions. We invest in our people by hiring team-oriented individuals with a passion for excellence and who treat others with mutual respect, while continuously training our people to improve our capabilities.

With locations throughout Wisconsin in Phillips, Medford, Eau Claire, Menomonie, New Richmond and Hudson, Phillips-Medisize offers opportunity for career growth and development. Phillips-Medisize also has locations around the world in Finland, Ireland, Switzerland, Czech Republic, Netherlands, Mexico and China.

PMS

" I Discovered Women's International Pharmacy through my physician. I was able to get a prescription made specifically for me to treat my hormone imbalance – PMS! Working in partnership with my physician and Women's International Pharmacy, I was able to obtain free educational information on hormone therapies by calling Women's International Pharmacy at: 1-800-279-5708. "

Education Is Power. "After I read the materials, I made an appointment with my physician and he wrote a prescription specifically for my hormonal needs. I feel good again!"

Women's International Pharmacy's Educational Resource Center provides free educational information regarding bioidentical hormone therapies for men and women.

More than a million dollars a week.

It feels good to give back. And for us, more than \$70 million* a year feels great! Together with the help and generosity of our customers and employees, that means we average more than a million a week to charities nationwide!

Making magic wherever our star shines.

Nationally, we've raised millions of dollars in partnership with Go Red For Women®, Make-A-Wish®, March of Dimes, Reading Is Fundamental and United Way, just to name a few.

Giving back begins at home.

Locally, we're proud to be a good neighbor and support hundreds of charities across the country. Our associates also volunteer more than 125,000 hours of service through our Partners In Time program each year.

For information on Macy's giving programs, go to macys.com/magicofgiving

*Includes grants from Macy's Foundation.

STYBERG
The Styberg Process

Design Issues:
 Increase strength
 while reducing weight and cost

Manufacturing:
 Heat Treating, Punch Press,
 Machining, Grinding

Solutions:
 Reducing part weights
 Manufacture with less operations
 while increasing part strength
 Improve part flatness, which is
 accomplished with secondary
 and specialized operations

Our engineering staff has the expertise to help you
 solve the most challenging design requirements.

The 2014 Wisconsin Badger Yearbook was printed by Suttle-Straus, Inc. of Waunakee, Wisconsin. Portrait photography was provided by Empire Photography of Madison, Wisconsin. The annual was written, edited and typeset using Adobe InDesign CS6, Adobe Illustrator CS6, Adobe Photoshop CS6 and various versions of Microsoft Word.

Proof pages were created on a personal Laser-Jet and final pages were output by Suttle-Straus, Inc. Captions, body content, and photograph credentials were set in Minion Pro. All titles were set in Minion Pro. Greek letters for the Greek section were set in Minion Pro.

The cover and division pages were designed by Eliana Berkoff and Pa Shoua Thao. Interior pages were designed by Eliana Berkoff and Pa Shoua Thao. The front and back endsheet photographs were taken by Claire Larkins and Hayley Cleghorn.

All works contained herein are copyright ©2014 The Wisconsin Badger, Incorporated.
