Exhibit A

In view of the national emergency, the committee on correlation of requirements in military science and physical education, appointed under faculty vote of June 19, 1941, recommends:

(a) That all male freshman and sophomore undergraduates except those who have been exempt by reason of physical disability or for other reasons will be required to take a minimum of two "hours" of physical education per week during each semester while enrolled as undergraduate students in the University of Wisconsin.

(b) That male undergraduates in the freshman and sophomore classes who are physically unfit as declared by the Department of Student Health will be exempt from the above requirement.

All male freshmen and sophomores are required by statute to take the basic ROTC course (unless excluded by the Military Department on the recommendation of the Department of Student Health).

Your committee further recommends:

(c) That the required physical education course for men and the basic ROTC course each carry zero credits per semester, and that the advanced ROTC courses carry credit as at present.

(d) That a standing Committee on Correlation consisting of the commandant, the director of the required physical education program for men, the director of student health, and four other professors be appointed by the President to make adjustment of requirements in military science and physical education with power to grant exemptions from the physical education requirement to all students who, from semester to semester, demonstrate their physical fitness; and to report annually to the Faculty on the nature and progress of their work.

(e) That these requirements go into effect at the opening of the academic year 1942-43 and remain in force until the close of the academic year in which peace is declared, and continue thereafter until modified by the Faculty.

(f) This Committee shall be empowered and authorized by the faculty of the University of Wisconsin to make such changes and other modifications in this program as circumstances shall demand.
